ACVP Workshop Is a Huge Success in San Antonio!

The Davis-Thompson Foundation kicked off several days of fantastic education and awards with its annual Diagnostic Pathology workshop - this year we finally landed a prize we had sought for several years – Michael Goldschmidt! It’s not the first time that Mike has lectured for the Foundation, but as an author on the first two fascicles in the series on Surgical Pathology of Domestic Species, specifically on Skin Tumors and Mammary tumors, it couldn’t have been more timely. And to add to the wealth of riches, his co-authors on the Mammary fascicle, Drs. Laura Pena and Valentina Zappulli were there to cover much of the material on mammary tumors as well.

Over 140 pathologists attended the workshop meticulously planned by course director Dr. Jennifer Chapman (who does a phenomenal job every year on this workshop). The morning saw Dr. Goldschmidt review the epithelial tumors of the skin (to include melanomas), and to introduce the mammary section by reviewing mammary gland anatomy. After a brief lunch period, Dr. Zappulli reviewed the criteria for the differentiation and diagnosis of mammary gland tumors of dogs and cats (it’s all in that fascicle, folks – available through the Foundation’s bookstore), Dr. Pena tackled the criteria of malignancy and how to apply them.

continued on Page 2...
Following a very spirited question and answer session at the afternoon break, Dr. Goldschmidt covered the largely overlooked neoplasms of the nipple, and the three experts ended the day with case reviews to illustrate many of the important points that came up during the day.

Before the workshop, Foundation CEO Bruce Williams sold off 60 copies of the two fascicles (at a 25% discount) in a flurry of cash and credit transactions (henceforward to be referred to as the “Great Book Riot of 2019”), but ultimately offered the same discount to any other participant in the course through the Foundation office, so while some attendees went home empty handed (why haven’t you already bought them?!!), no one went home unhappy.

After the grueling day, we don’t know where all of the participants went, but the faculty, their spouses, and Drs. Chapman and Williams had a lovely dinner at the nearby and history Menger Hotel, where the subject of mammary tumors didn’t come up even once.

Make your plans to attend next year’s workshop at ACVP 2020 in Chicago, where the workshop will be Oral and Maxillofacial neoplasms with presenters Dr. Cindy Bell and Dr. Brian Murphy!

“1st Costa Rican Meeting of the CL Davis SW Thompson Foundation”
April 17-18-19, 2020

FRIDAY 17, SMALL ANIMALS:
08:30 - 09:00: Registration.
09:00 - 11:00: Gross diagnosis in veterinary pathology. Francisco Uzáez.
11:00 - 11:15: Coffee break.
15:45 - 17:15: Respiratory diseases. Leonardo Minatel.

SATURDAY 18, CATTLE:
08:30 - 08:30: Registration.
08:30 - 10:30: Necropsy techniques and sampling in large animals. Leonardo Minatel.
10:00 - 10:30: Coffee break.
10:30 - 12:00: Clostridial diseases. Francisco Uzáez.
12:00 - 13:30: Lunch.
13:30 - 15:00: Alimentary pathology. Francisco Uzáez.
15:00 - 15:30: Coffee break.
15:30 - 16:30: Respiratory diseases. Francisco Uzáez.
16:30 - 17:30: Bovine abortion. Francisco Uzáez.

SUNDAY 19
08:30 - 09:00: Registration.
09:00 - 12:00: Practical seminar on interpretation of macroscopic lesions. Francisco Uzáez, Leonardo Minatel, Roberto Oliveras.

Location:
Auditorio, Escuela de Cirugía y Medicina Veterinaria
San Francisco de Asís, Universidad Veritas,
San Rafael, Vázquez de Coronado, San José, Costa Rica.

Faculty:
- Francisco Uzáez, DVM, MSc, PhD, DAVCP, University of California-Davis, USA.
- Leonardo Minatel, DVM, PhD, University of Buenos Aires, Argentina.

Information and registration:
Dr. Roberto W. I. Olivares,
Dr. Fernando Robles Herrera,
Dra. Paula Peña Alvarez

VI WNPRC Lab Animal Medicine and Pathology Seminar with International Mock-ACLAM Exam*

Tuition to the program is free * to attendees, thanks to our sponsors Wisconsin National Primate Research Center, School of Veterinary Medicine UW Madison, C.L. Davis DVM Foundation, Latin Comparative Pathology Group, and UW RARC.

May 2-3, 2020

Location: School of Veterinary Medicine Lecture Hall 2350, University of Wisconsin, 2015 Linden Dr. Madison, WI 53706

***Registration: May 2nd (on-site, first day of the seminar) at UW Vet School 8:00-8:30 am, Lecture Hall 2350. To enroll in our seminar mailing list email Dr. Mejia amejia@primate.wisc.edu

***Times to access the building will be limited from 7:50-8:00am and 12:45-1:00pm with a valid Seminar ID.
- Program TBA.

Lecture topics include: Keynote Speakers: Drs. Bettina Gentry and Craig Franklin

- Mice, zebrafish, rabbits, non-human primates, other primary and secondary species
- Veterinary Pathology
- Anesthesia and AVMA Panel on Euthanasia
- Regulations and welfare
- Exam preparatory discussion by new ACLAM and ACVP Diplomates
- International Mock Exam Coalition Examination (for ACLAM and ECLAM exam preparation)

Program Directors: Andres Mejia DVM, MS, DACLAM, DACVP amejia@primate.wisc.edu
Rebekah Franklin, DVM, DACLAM franklin@rarc.wisc.edu

* Continuing Education hours provided by the UW School of Veterinary Medicine (UW-SVM). A fee of $22.50 will be assessed to individuals that request CE certification. The UW-SVM is an accredited continuing veterinary medical education provider; however, participants should be aware that some boards have limitations on the number of hours accepted in certain categories and/or restrictions on certain methods of delivery. It is recommended that you check with your state veterinary licensing organization to find out what the requirements are to maintain your license.
GROSS PATHOLOGY REVIEW COURSE 2020
Tuesday May 5th – Saturday May 9th 2020
The Ohio State University College of Veterinary Medicine
Columbus, OH

LECTURES ON MACROSCOPIC PATHOLOGY OF:
Swine • Birds including poultry • Reptiles & Amphibians • Zoo & Exotic Animals
Dogs & Cats • Fish • Non-human Primates • Laboratory Animals
• Ruminants • Wildlife • Horses
Cognitive errors in pattern recognition
Mock exam

Diagnostic Exercise
From The Davis-Thompson Foundation*

Case #118  Month: March Year: 2019

Contributors: Hibret A. Adissu, National Cancer Institute, National Institute of Health, Bethesda, MD, USA.

Clinical History: Sixteen-week-old C57BL6 mouse from the International Mouse Phenotyping Consortium (IMPC) generated and phenotyped at The Centre for Phenogenomics (Toronto, Canada). A protruded xyphoid was reported in this colony affecting both transgenic and WT mice; males were affected >2X females.

Necropsy Findings: Necropsy findings from one of the mice with protruded xyphoid revealed a fibrous adhesion between the sternum and the pericardium. Attached to the center of the inner surface of the sternum (thoracic surface) is a 3x3x2 mm firm/hard nodular mass (top right image below). The right ventricular epicardial surface overlying this nodular mass had a ~ 3x3 mm area of pallor (bottom right image below).

Follow-up questions: Morphologic diagnoses, potential relationship between the sternal and cardiac lesions, potential etiology/cause, comparative pathology significance

Answers and more info here!

*The Diagnostic Exercises are an initiative of the Latin Comparative Pathology Group (LCPG), the Latin American subdivision of The Davis-Thompson Foundation. These exercises are contributed by members and non-members from any country of residence. Consider submitting an exercise!
Become a member of the Latin Comparative Pathology Group

LCPG:

CES 3: Carcinogenesis  
March 2020 - Department of Pathology, Cambridge, UK  
Registration for this symposium will open in December 2019

This Continuing Education Symposium will provide an intermediate level overview on Carcinogenesis and the challenges with current research models. Topics to be covered include (but are not limited to): How to understand the relevance/future of rodent 104 week studies; how to interpret carcinogenicity data in the risk assessment of novel chemicals and pharmaceuticals; familiarisation with the latest molecular techniques used in the research and exploration of carcinogenesis; how to differentiate spontaneous from test article-related lesions and tumours and, follow real-world case studies to refine your skills and knowledge around regulatory authority. The format will include presentations, case histories and active participation of delegates. The Continuing Education Symposium will be of 3 days duration and the programme will be arranged such that each individual day can be attended as stand-alone CPD if desired.

For more information on any of these meetings, keep checking the website -  
http://www.bstp.org.uk/events or contact the BSTP Secretariat - bstpoffice@aol.com

Retiring?

Have slides left over from your recent slide seminar? Just looking to free up some storage space? The Foundation is looking for additional glass slides, kodachromes and other similar materials for its Correspondence Division and Study Centers. All materials should be well-identified with as much accompany history and discussion as possible, as these materials are expressly used for teaching. Moreover, as the Foundation is a publicly donative charity, all donated materials are tax-deductible. For more information, please contact Dr. Bruce Williams at bruce.h.williams.dvm@gmail.com.

Davis-Thompson Foundation Pathology Externship

Since 1980, the Davis-Thompson Foundation lab sites have hosted more than 125 veterinary students at 8 participating diagnostic laboratories. These students usually have a strong interest in pathology itself or zoo or poultry medicine that require a strong pathology background. The Foundation is always interested in having veterinary students apply for an externship and we would like to add more externship sites that do not usually have veterinary students, to help increase their interest and knowledge of pathology with some off-campus experience. For more information, contact Dr. Jim Britt, jobritt@sbcglobal.net; 501-912-1449.
Sarah Corner Awarded the MSU 2020 Special Recognition Award for Promoting International Understanding

Sarah Corner, DVM, PhD, DACVP, academic specialist at Michigan State University Veterinary Diagnostic Laboratory, was awarded the 2020 Special Recognition Award for Promoting International Understanding by Michigan State University International Studies and Programs. Sarah was awarded for her work with the Global Health Pathology Network and veterinary pathology capacity building efforts in Uganda and Rwanda.

Did you know?

The “An Atlas of Metazoan Parasites in Animal Tissues” by Gardiner and Poynton is available on line? …and in Spanish!!!

XIII Seminar of the Argentinean Division of the CL Davis/SW Thompson Foundation and X Forum on Teaching Veterinary Pathology

The XIII Seminar of the Argentinean Division of the CL Davis/SW Thompson Foundation was held on Thursday 14 and Friday 15 of November in San Carlos de Bariloche, Patagonia, Argentina, in the foothills of the majestic Andes Mountains and on the shore of the magnificent Nahuel Huapi Lake. The seminar was followed on Saturday 16 by the Forum on Teaching Veterinary Pathology. The Organizing Committee included Drs Agustin Martinez and Carlos Robles, from the National Institute for Agricultural Technology (INTA), who had the great help from an enthusiastic group of people: Patricia López, Marta Chodilef, Raul Cabrera, Marcela Larroza, Carmelina Silva, Paula Soler, Romanela Marcellino and Alejandra Abdala.

The Seminar and the Forum were very well attended by 99 veterinarians from all corners of Argentina and Chile, including pathologists, lecturers, private practitioners, researchers, extension officers and students. Dr Claudio Barros, from Universidad de Santa Maria, Brazil, lectured on the main neurologic diseases of cattle diagnosed in Brazil from the 1960s to the present day and on the main toxic plants in Southern Brazil, a topic on which he is a world leader.

Dr Cristina Acín, from Universidad de Zaragoza, Spain, presented a very detailed lecture on how to approach the diagnosis of neurologic diseases in small ruminants, including a description of the main neurologic diseases of small ruminants in Spain. Dr Francisco Uzal, University of California-Davis and President of the Davis/Thompson Foundation, gave a thorough presentation on clostridial diseases of ruminants. Each of the three invited speakers also presented an example of the diagnostic work up followed in their laboratories to reach a diagnosis. This was followed by mock gross exams which were discussed with the participants. Finally there were 10 presentations selected from abstracts submitted by the audience. Dr Mauricio Navarro, UCDavis, received an award for the best presentation (Bacillary hemoglobinuria in cattle); runner ups were Dr Alex Correa, private practitioner (Malignant Catarrhal Fever in cattle) and Dr Leandro Di Paolo, La Plata University (Nutritional myopathy in sheep).

The last day of the meeting was the Forum, which included presentations by Drs Juan Micheloud (INTA Salta, Argentina), Germán Cantón (INTA Balcarce, Argentina) and Carlos Robles (INTA Bariloche, Argentina).

Call for Abstracts and Student Travel Awards/Grants

Visit the annual symposium website (https://www.toxpath.org/AM2020) to review the preliminary program, complete your registration and hotel reservations early, submit your abstract, and apply for awards.

Call for Abstracts- Abstract Submission Deadline: March 30 by 5:00pm EST

Student Opportunities- Submit Abstracts and Applications Online

- **STP Student Travel Grants**- Abstract and Application Deadline: March 30
  - **Who:** Undergraduate, veterinary and graduate students, residents and postdocs
  - **What:** Stipend to defray costs associated with attending the convention, complimentary meeting registration, and complimentary student membership (for the following year). Recipients will be honored at the Award and Recognition Ceremony on Wednesday
  - **Apply:** Abstract, application form, personal statement, letter of recommendation, Curriculum Vitae

- **STP Young Investigator Awards**- Abstract and Application Deadline: March 30
  - **Who:** Undergraduate, veterinary and graduate students, residents and postdocs
  - **What:** 1st place, $750; 2nd place, $500; 3rd place, $250 are presented at the STP meeting for the top three student poster abstracts
  - **Apply:** When you submit an abstract online, please check the appropriate box to indicate your interest in applying for the Young Investigator Award

- **STP Environmental Toxicologic Pathology SIG Student Research Award**- Application Deadline: March 30
  - **Who:** Undergraduate, veterinary and graduate students, residents and postdocs
  - **What:** The award recipient will receive The Fundamental of Toxicologic Pathology 3rd Edition and be recognized at the ETP-SIG meeting
  - **Apply:** First author poster abstract online, letter of recommendation, statement of career goals, Curriculum Vitae. Email application to stp@toxpath.org with subject line “ETP-SIG Student Research Award.” Also check the appropriate box when submitting abstract online
