A message from the CEO, President, and Treasurer:

The Davis-Thompson Foundation was established in 1973 with a set of tenets by the first Foundation president, Sam Thompson, which have been expanded over the years, but are the bedrock upon which the Foundation operates:

"The Foundation rejects all manifestations of discrimination, including those based on race, ethnicity, gender and gender expression, sexual orientation, nationality, citizenship status, age, disability, religious beliefs or lack thereof, political beliefs, socioeconomic class, or any of the other differences among people which may be excuses for misunderstanding, dissension or hatred. We recognize and cherish the richness contributed to our lives by our diversity. We take pride in all our achievements, and we celebrate our differences."

The Foundation is proud to welcome its first female President, Dr. Jey Koehler, this month. It is heartening to see the increasing role of women in leadership positions in our profession, and consistent with the Foundation’s tenets.

Last October, we also welcomed Dr. Paola Barato to the position of President of the Latin Comparative Pathology Group, The Latinamerican Division of the Davis Thompson Foundation.

In 1987, March was designated as Women’s History Month in the United States, a month to celebrate women’s contributions to history, culture, and society in general. Additionally, March 8 is International Women’s Day (IWD) all over the world, and the theme this year is “Choose To Challenge”. The IWD 2021 campaign tells us that “… Individually, we’re all responsible for our own thoughts and actions – all day, every day. We can all choose to challenge and call out gender bias and inequality. We can all choose to seek out and celebrate women’s achievements. Collectively, we can all help create an inclusive world. From challenge comes change, so let’s all ‘#ChooseToChallenge’…”.

Together, the leadership of the Foundation stands strongly against any form of prejudice, harassment, or violence of any kind against women anywhere, and especially against our fellow pathologists and trainees as they pursue their professional goals. Worldwide, women make up only 35% of STEM graduates, are still struggling to close the pay gap and have equal representation in leadership positions and political bodies, and continue to shoulder a disproportionate burden of child care and other unpaid and often unacknowledged domestic labor. Yet despite these challenges, we have also seen recently record numbers of female Nobel Prize winners, a female Vice President, and a closing of the gap between male and female investigators for first-time NIH R01 grants, among many other positive things. This month (and every month!), we hope you will join us in lifting up the voices and the many accomplishments of women veterinary pathologists, pathology trainees, veterinary students, all over the world.

One of the first (many) initiatives of Jey was to organize a seminar on Women’s voices in Pathology, which is currently scheduled for July 30. We hope that you will join on that day for another discussion on the importance, viewpoints, and continuing contributions of women pathologists in our field.
Recognition of outstanding Latinamerican scientist: Dr Paola Barato

The Latin Comparative Pathology Group, The Latinamerican Division of the Davis Thompson Foundation, is very proud to announce that its recently appointed president, Dr Paola Barato, was selected by 3M as one of the 25 emerging scientists, from of a total of 1,000 applicants, who presented projects to improve the life of people in the region.

This distinction is part of the international Day of Women and Girls in Science, which is commemorated on the 11th of February every year. Dr Paola Barato was chosen for her project on "Glycoinhibitors of bacterial adherence in fish", for which she also obtained a patent.

Congratulations
Paola!!!
I will help forge a gender equal world

"EXCELLENT WORK WAS DELIVERED"

"JUST GREAT! SECOND PART PLEASE!!!"

"GREAT SHARING, TRULY APPRECIATE THE PRACTICAL ASPECTS OF THE PRESENTATION."

"FABULOUS! PRACTICAL, INTERESTING, AND AN EXCELLENT SPEAKER"

"THANK YOU SO MUCH FOR A WONDERFUL LECTURE. IT WAS VERY CLEAR, CONCISE AND EASY TO UNDERSTAND. I PARTICULARLY ENJOYED THE INCORPORATION OF OTHER CLINICAL ASPECTS (SUCH AS RADIOGRAPHS) RATHER THAN JUST MICROSCOPIC OBSERVATIONS."

DIAGNOSTIC SERIES: DIAGNOSTIC AVIAN CASES

"LOVELY IMAGES, AND A REALLY ENGAGING SPEAKER"

"EXCELLENT PRESENTATION AND DETAILED KNOWLEDGE ABOUT AVIAN DISEASE DIAGNOSIS"

"EXCELLENT; SPECTACULAR. PLEASE HAVE MORE. EBONY IS AN EXCELLENT AVIAN PATHOLOGIST; PLEASE HAVE HER AGAIN"

"EXCELLENT SEMINAR, ACCURATE AND EASY TO UNDERSTAND"

"GREAT JOB WITH AMAZING IMAGES. I ENJOYED HOW THE PRESENTER CORRELATED CASES THAT HAD SIMILAR LESIONS AND PRESENTATIONS TOGETHER. VERY HELPFUL"

Cada palestra poderá lhe créditeno ACVP MOC (Maintenance of Certification)
Clinical History: Approximately 1-week-old Corriente heifer calf that did not receive colostrum within the first 48 hours after birth. It died naturally.

Necropsy Findings: The heifer was in fair nutritional condition and had a dark purple, dry, shrunken umbilicus. The peritoneal cavity contained approximately 200 ml of light yellow to light red, thin, turbid fluid with multiple yellow friable clumps and membranes (fibrin) loosely adherent to the visceral serosa and adventitia of the umbilical arteries. The liver was mottled light brown and dark red with miliary, random, 1-3 mm diameter, tan, flat foci (Figure 1A). The rumen contained small amount of fibrous ingesta and some leaves. The abomasum had moderate amount of curdled milk and fewer shavings. The abomasal mucosa was diffusely dark purple and mildly edematous. Segments of the mid jejunum were gas-distended and thin-walled. The mesocolon was moderately edematous. The ileum and spiral colon were unevenly dilated with mildly thickened walls and segmental hemorrhagic casts (Figure 2A). The ventral portion of the right cranial lung lobes had few patchy dark red, up to 5 mm diameter, flat foci. All carpal and tarsal joints contained small amounts of intra-articular fibrin and increased amounts of thin yellow synovial fluid.

Gross and Microscopic images:

Figure 1 – Liver with miliary tan foci (A). Photomicrograph of the liver (B) and Gram stain highlighting intralesional short to pleomorphic bacilli (inset).
Follow-up Questions:
(1) Morphologic diagnoses (gross combined with histopathology);
   (2) Most likely etiology.

Retiring?
Have slides left over from your recent slide seminar? Just looking to free up some storage space? The Foundation is looking for additional glass slides, kodachromes and other similar materials for its Correspondence Division and Study Centers. All materials should be well identified with as much accompany history and discussion as possible, as these materials are expressly used for teaching. Moreover, as the Foundation is a publicly donative charity, all donated materials are tax-deductible. For more information, please contact Dr. Bruce Williams at bruce.h.williams.dvm@gmail.com.

Davis-Thompson Foundation Pathology Externship
Since 1980, the Davis-Thompson Foundation lab sites have hosted more than 125 veterinary students at 8 participating diagnostic laboratories. These students usually have a strong interest in pathology itself or zoo or poultry medicine that require a strong pathology background. The Foundation is always interested in having veterinary students apply for an externship and we would like to add more externship sites that do not usually have veterinary students, to help increase their interest and knowledge of pathology with some off-campus experience. For more information, contact Dr. Jim Britt, jobritt@sbcglobal.net; 501-912-1449.

Calling all students and residents curious about toxicologic pathology!

The Student/Resident Corner (SRC) is a new addition to the Society of Toxicologic Pathology’s website that aims to provide community and resources to help you learn more about this career path and connect with others interested in the field. It includes a calendar of upcoming events, information on previous speakers/training institution program (STIP) visits, externships, scholarships/awards, and profiles of our student liaisons and current pathologists working in the field. It is free, available to all students and can be accessed under the student tab on the STP website homepage. CLICK HERE to go directly to the SRC homepage.
Virtual Continuing Education Symposium 3: Carcinogenesis
2nd – 11th March 2021
Tuesday, Wednesday, and Thursday
13.00 – 16.30 (GMT+0/UCT+0)

Approved by the Royal Society of Biology for the purposes of CPD, this event may be counted as approximately 54 credits. Approximately 17.5 hours of educational activity will be recorded on Attendance Certificates.

Registration for this symposium is still open - nearly 50% of the places have been taken, with numbers limited to a maximum of 50 delegates!

<< Due to the reduced logistical requirements for this virtual symposium, the BSTP have been able to extend the early registration fee to 5th February 2021 and the closing date for registration to Friday 19th February 2021 >>

Continuing Education Symposium 3 will be held over two weeks - on the afternoons of Tuesday 2nd, Wednesday 3rd, Thursday 4th, Tuesday 9th, Wednesday 10th and Thursday 11th March 2021, from 13.00 – 16.30 (GMT+0/UCT+0) each day.

Access to the downloadable course materials and Zoom login information will be provided up to one week in advance of the symposium to all those who have registered and paid.

This virtual CES will provide an overview on carcinogenesis and the challenges with current research models. Topics to be covered include (but are not limited to): cancer in man and the history of carcinogenesis; investigation of the pathogenic mechanisms involved in carcinogenesis; significance and interpretation of neoplasia in laboratory rodents; use of immunohistochemistry for tumour identification; an overview of animal models of cancer; Inhalation toxicity and carcinogenesis; the regulatory view of carcinogenicity testing; and will include lectures, presentations, and case histories.

To reserve a place or if you would like further information about this symposium, please contact the BSTP Secretariat – bstpoffice@aol.com

CLICK HERE for more information.
Virtual Continuing Education Symposium 4: Respiratory System
6th – 15th July 2021
Tuesday, Wednesday, and Thursday
13.00 – 16.30 (GMT+1/UCT+1)

Approved by the Royal Society of Biology for the purposes of CPD, this event may be counted as approximately 54 credits. Approximately 17.5 hours of educational activity will be recorded on Attendance Certificates.

Registration for this symposium will open in December 2020/January 2021 with numbers limited to a maximum of 50 delegates – registration will close at midnight on 18th June 2021!

Continuing Education Symposium 4 will be held on the afternoons of Tuesday 6th, Wednesday 7th, Thursday 8th, Tuesday 13th, Wednesday 14th and Thursday 15th July 2021, from 13.00 – 16.30 (GMT+1/UCT+1) each day.

Access to the downloadable course materials and Zoom login information will be provided up to one week in advance of the symposium to all those who have registered and paid.

This virtual Continuing Education Symposium will provide an overview of the respiratory system including INHAND, rodent and non-rodent respiratory pathology, toxicology and risk assessment as well as reviewing challenges in agrochemical safety assessment. The format will include lectures, presentations, and case histories.

To reserve a place or if you would like further information about this symposium, please contact the BSTP Secretariat – bstpoffice@aol.com

CLICK HERE for more information.
The 36th Annual Scientific Meeting of the BSTP and AGM Pathology of Humanised Mouse Models
Thursday 11th and Friday 12th November 2021
Date and venue to be confirmed

Immunodeficient mice reconstituted with a human immune system are increasingly used for modelling the human immune compartment in numerous preclinical applications, such as adoptive cell therapy and immuno-oncology studies. With the advent of new Advanced Therapy Medicinal Products, humanised mice are a key component of efficacy and safety assessment in preclinical programmes, including GLP studies. However, limited information is available concerning the morphological aspects of human cell engraftment and the spectrum of spontaneous and experimentally induced histopathological lesions occurring in these mice.

Working with the Pathological Society of Great Britain and Ireland the meeting will cover the main features of the different humanised mouse platforms; their experimental applications in drug development, oncology and gene and cell therapies; specific safety and regulatory considerations; and future promise and remaining challenges. A short session will also be devoted to chimeric mice with humanised livers, as tools for the study of human drug metabolism and toxicity. The aim is also to have parallel sessions covering ‘mouse pathology’ and ‘humanised mice in preclinical studies: context and regulatory aspects’.

The first day of the meeting will include the Annual General Meeting of the BSTP.

Keep checking the website for details of bursaries and the submission of abstracts for case presentations.

Sponsorship and Promotional Opportunities
We feel that by participating in this conference it would allow your company to showcase a range of products to a diverse group of scientists. Please contact the BSTP at bstpoffice@aol.com for more information.

Registration will open in March/April 2020, to reserve a place or if you would like further information about this meeting please contact the BSTP Secretariat – bstpoffice@aol.com

CLICK HERE for more information.

If you are interested in attending any events organised by the BSTP, please visit the BSTP website - http://www.bstp.org.uk/bstp-events/ or for details of events organised by other organisations - http://www.bstp.org.uk/non-bstp-events/ or contact the BSTP Secretariat: bstpoffice@aol.com

2021 ACVP Pre-Conference Workshop

Soft Tissue Tumors are "Hard": Current Perspectives

Dr. Paola Roccabianca  Dr. Giancarlo Avallone  Dr. F. Yvonne Schulman

Guest Speaker
Dr. Brian Summers

Speakers will present material from the third volume of the series, Surgical Pathology of Tumors of Domestic Animals: Tumors of Soft Tissues, with a special guest lecture by Dr. Brian Summers.

Date: Saturday, October 30 2021
Time: 8:00am - 5:00pm (Pacific time)
Venue: The 2021 ACVP/ASVCP Concurrent Annual Meeting and this pre-conference are scheduled for a hybrid format, with face-to-face meetings in Seattle and virtual components.*

*Note: We will continue to monitor the pandemic in the coming months and may need to make adjustments to the format, depending on evolving circumstances.
