

Latin Comparative Pathology Group

The Latin Subdivision of the CL Davis Foundation

Diagnostic Exercise

Case #: 31 Month: April Year: 2013

Contributor: Enrique Paredes-Herbach, DVM Dr. med.vet. – Instituto de Patología Animal, Facultad de Ciencias Veterinarias, Universidad Austral de Chile, Valdivia, Chile.

Clinical History: Several steers (approximately 2 years old) had proliferative and ulcerative lesions on the skin (see picture below), mostly on the head, neck and flank regions. Skin biopsies were requested.

Follow-up questions, please provide: (a) gross morphologic diagnosis, (b) 3 possible etiologies, and (c) likely histopathological findings.

Please send your comments/questions to the whole LCPG list by hitting "reply to all".

A final document containing this material with answers and a brief discussion will be posted on the C. L. Davis website by the end of the current month (http://www.cldavis.org/lcpg_english.html).
