On May 4 and 5, the Davis Foundation’s Board of Directors held its annual meeting at the Foundation’s new headquarters in Gurnee Ill. An unassuming split-level in a tony suburb of Chicago now houses and hosts the many and varied functions of your Foundation – from publication printing and distribution to meeting planning and administration, the heart of the Foundation now beats from within its own four walls.

Over thirty of the Foundation’s board members, course directors, and national and international division directors descended for the traditional May meeting. For many who had been accustomed to meeting in hotel boardrooms, it was their first view of the Foundation’s nerve center, including its computer network, DVD and videotape burning facility, and new meeting rooms (outfitted with wireless Internet and computer projection.) Alas, the meeting room which seemed so spacious before the tables and chairs were moved in became almost too cozy when the participants assembled to kick off the meeting.

This year’s agenda was its most ambitious yet, with over 55 items of old and new business to cover, but with Foundation CEO Sam Thompson at the helm, discussions were kept brief and on point. As in previous years, Saturday morning was spent in reviewing the organization’s many courses from the previous year, their successes, problem areas and plans for 2008. The afternoon was reserved for discussion of new courses, including the Foundation’s inaugural week-long general path course in summer 2008 (more details to come this summer) as well as discussions of plans for international initiatives in 2008 and beyond. Following the end of the day’s discussions, the group adjourned outside to enjoy an impromptu “show and tell” of poultry pathology by Dr Rob Porter of the University of Wisconsin Diagnostic Lab, who stopped by on his way to a poultry pathology conference in a van full of specimens. This special hour recalled the Foundation’s early days when an appearance by John King would not be complete without an impromptu quiz on gross pathology for the other attendees. Before leaving for dinner, everyone agreed that it was a wonderful way to reinforce why they were all in Gurnee, and a very enjoyable end to the day.

(Continued on page 2 …)
The traditional Saturday dinner allowed the participants, many of whom had traveled halfway around the world to be in attendance, to mingle and compare experiences, and the after dinner toasts and impromptu speeches were touching, especially that of Ugandan pathologist Dr. Ojok Lonzy, who saluted CEO Dr. Sam Thompson, President Dr. Bruce Williams, and Treasurer Dr. Vladislava Rac for their efforts on behalf of post-graduate pathology education in Southern Africa.

Sunday morning was spent on discussions on concepts and new challenges facing the Foundation – the widening need for corporate sponsorship to offset both the increasing costs of courses as well as the number of new initiatives in countries desiring to share in the C.L. Davis. A review of the new web site and discussion of plans for further development, as well as highlighting the new publications and works in press for 2007 rounded out the morning.

It was an enjoyable but tiring meeting, and everyone heading out Sunday afternoon left Gurnee not only impressed by the level of the Foundation’s accomplishments in 2006, but excited to continue this work in 2007 and 2008.

Bruce Williams, DVM
President, C.L. Davis Foundation

---

**NORTHEAST SUBDIVISION DAY SEMINAR AT TUFTS**

The 2007 second day seminar of the NE subdivision took place was kindly hosted by the Tufts University Cummings School of Veterinary Medicine on Friday, May 11. In addition to being the first day seminar in the New England area, this event also represented the first time that NE Division director Dr. Zadok Ruben has brought this innovative lecture series to a university setting. Dr. Nicola Parry, assistant professor of pathology at Tufts organized a great program on “Bridging the Gap in Academic-Industrial Biomedical Research”. The program included speakers from Tufts University faculty, industry (including Pfizer and Archemix), consulting organizations, and the ACVP/STP Coalition for veterinary fellows. The last hour of the program featured a lively interactive panel discussion between faculty members and the audience on general points related to the presentation.

We would also very much like to thank our program sponsors, including Wyeth Research, Pfizer, Biogen Idec and Millenium Pharmaceuticals, for their vision and assistance in helping us inaugurate this new program. The Foundation recognizes the importance of this forum, which fosters networking between university faculty and representatives of the pharmaceutical industry, and foresee this as a model for similar Foundation programs at universities throughout the U.S. in 2007 and beyond. If your organization or university would like to discuss the possibility in participating in a similar program in 2008 or beyond, please contact Zadok Ruben at zruben@patoximed.com

Zadok Ruben, DVM, PhD
Director, NE Sub-Division

---

**THE INTERNATIONAL SOCIETY OF VETERINARY DERMATOPATHOLOGY (ISVD) ENCOURAGES NEW MEMBERSHIP**

ISVD promotes the advancement of veterinary and comparative dermatopathology. This organization is composed of individuals with a professional interest in the histopathologic interpretation of skin disease. The organization would like to encourage those interested in membership to visit our website (www.isvd.org). Difficult clinical cases from across the world are often reviewed and discussed in a lively forum on the ISVD listserv. The next next meeting of ISVD is a precongress day before the World Congress of Veterinary dermatology, Hong Kong November 2008. Please note that membership is free to pathology and dermatology trainees.
1ST KOREAN FOUNDATION SYMPOSIUM A HUGE SUCCESS

On May 9-11, the Foundation, the lively First Annual Korean Symposium of the Korean Division of the C.L. Davis Foundation was held from May 9-11, 2007, NVRQS, Anyang, Seoul, Korea. on May 9-11, 2007. It started off with an introductory speech by course organizer and Division director Dr. Nam-Yong Park from Chonnam National University followed by a formal introduction of the Davis Foundation faculty - Dr. Matti Kiupel from Michigan State University, Dr. John Edwards of Texas A&M University and Dr. Paul Stromberg from Ohio State University. The symposium, entitled “Gross Pathology of Livestock” was held in conjunction with a national meeting of Korean swine practitioners and food inspectors. It was a huge gathering of over 450 participants, which include pathologists, meat hygienists, clinical veterinarians, and graduate students from several universities in Korea, Professionals also came from India, Italy, Taiwan, Philippines, Indonesia, Poland and Russia.

The meeting took place at the National Veterinary Research & Quarantine Service in Anyang, a suburban community of Seoul. The visiting faculty were housed at the Hoam Faculty Housing facility at Seoul National University, an excellent modern full service hotel right on the university campus in the middle of downtown Seoul. Dr. Kiupel did double duty presenting seminars on “Emerging Diseases of Swine” as well as “Trends of Swine Diseases in the USA” to the swine practitioners as well as a review of “Gross Morbid Pathology of Swine”. Dr. Stromberg gave a general overview of the principles of gross interpretation with a lecture on “The Macroscopic Basis for Microscopic Pathology or “Why We See What We See at Autopsy”). Dr. Edwards gave an excellent presentation on “Slaughterhouse Pathology of Cattle and Pigs”. Dr. Park gave a presentation on “Slaughterhouse Pathology and Pathogenesis”. All of the lectures by the visiting faculty were simultaneously translated into Korean. Dr. Dae-Yong Kim, a veterinary pathologist from the host institution Seoul National University, not only provided translation services but also helped with the superb local arrangements.

Another unique feature of the symposium was the fact that it was presented at no charge for all participants. “A $300 registration fee would have resulted in less than 20 participants for the symposium,” noted director Nam Yong Park. “This shows that the human beings are very fond of the free offers, like what they receive in many public places in Korea!”

The local arrangements were superb. The Korean hosts were outstanding, overseeing every detail of the meeting and our visit. Seoul is an interesting modern bustling city. It appears to be at the heart of a vibrant growing national economy. However, as very little is written in English there were some challenges for the visiting professors in navigating – but because of the excellent support provided to us, the language barrier was not a problem. The trip became not only a scientific and cultural exchange but a brief glimpse into the rich history of this country. Dr. Park and his associates provided assistance at every turn. He arranged several guided tours of Seoul and its historic areas and palaces for us to visit during our hours away from the symposium.

The Seoul Grand Park Zoo is a beautiful modern facility with successful breeding programs for several species and some of us were treated to a behind scenes tour of this facility. The host also treated the visiting faculty to a traditional Korean feast one evening and a traditional Korean barbecue another night. Dr. Park indicated that the symposium was a great success and was well received by the several hundred attendees. This bodes well for future symposia and other activities C.L. Davis wants to promote.

Veterinary pathology is flourishing in Korea and it seems a good place for the Foundation to promote its goals. Hopefully as future C.L. Davis programs unfold in Korea, others will get the chance to visit this fascinating, vibrant culture with its mix of ancient history and firm commitment to modern scientific endeavors. This first step will bring Korea and western veterinary pathology closer together in what will surely be projects of common interest and strengthen veterinary pathology everywhere in the world.

Dr. Nam-Yong Park, Organizer, Korean CLD Symposium
And
Dr. Paul Stromberg, Member CLD Board of Directors
C.L. DAVIS HAS CONTINUED SUCCESS IN EASTERN EUROPE

The Foundation’s 4th Eastern Europe Pathology Symposium was held at The University of Belgrade, Belgrade, Serbia on the 24th and 25th of May, 2007. Professor Milijan Jovanovic, served as the Symposium Director and Professor Sanja Aleksic-Kovacevic served as Co-Director. Other senior officers of the Foundation were in attendance to greet the registered attendants and guest lecturers of the symposium, including Professor Alun Williams, Vice-President for the European Division, Dr. Vladislava S. Rac, Senior Treasurer of The Foundation, and Dr. Matti Kiupel, Member of the Board of Directors.

The symposium faculty defined diversity in subject matter as well as their country of origin. All lectures were presented in English. Local speakers included Maja Velhner, DVM, PhD of the Veterinary Institute, Novi Sad, Serbia on Infectious Bursal Disease and Zivka Ery, MD, PhD and Milana Pankovic, MD, PhD of the Institute for Pulmonary Disease, Sremska Kamenica, Serbia on diagnostic cytology. American presenters included Dr. Fred Hoerr on avian pathology and Dr. Matti Kiupel on troubleshooting immunohistochemistry and molecular techniques in diagnostic pathology. Italian professor Paola Roccabianca, of Dipartimento di Patologia Animale, Milano University, presented two hours on descriptive techniques in pathology. The United Kingdom was represented by Udo Hetzel, of the University of Liverpool, who presented two hours of reptile pathology, and Peter Hamilton, MD, PhD of the Institute of Pathology, Queen’s University of Belfast, who gave an excellent two hour lecture on digital photography. Lastly, but certainly not least, Swiss Professor Felix Ehrensperger, DVM of the University of Zurich, Switzerland reviewed the diseases and pathology of the spleen.

Registered attendees numbered 50 and came from 12 different countries: Albania, Bulgaria, Bosnia & Herzegovina, Greece, Italy, Macedonia, Montenegro, Slovenia, Serbia, Switzerland, United Kingdom, and the United States of America. Upon the conclusion of the Symposium late Friday afternoon, this International group of new and old friends adjourned to the Kalemegdan fortress in Belgrade, which overlooks the Danube River. There they dined at Kalemjegdanska Terasa, gazed at the traffic on the Danube and talked about the immediate past symposium and the next Foundation Symposium which will be held in Dubrovnik, Croatia, in 2008.

1st ANNUAL STP/CLD MEETING IS A NATURAL

On June 10th, representatives of the Foundation, the Society of Toxicologic Pathology, and over 80 attendees gathered for four hours to listen to an illustrious slate of speakers discuss “The Pathology of Natural Products”. A fact that most members of both organization may not know is that both organizations actually come from the same tree. Sam Thompson, DVM, CEO and founder of the Davis Foundation actually founded the STP as well, served as its second President, and was elected to Distinguished Membership in the STP in 1978.

Dr Fred Oehme from Kansas State University began the morning with an excellent review of the mechanisms and pathology associated with four classes of toxins found in nature, including algal toxins, mycotoxins, bufotoxins, and snake venom. Dr. David Newman Ph.D. from National Cancer Institute followed with an excellent review of some of the origins of currently used microbials and anticancer drugs and spun fascinating tales of little-known potential drugs available in a wide variety in plants and animals today. Dr. Freddie Ann Hoffman of Heterogeneity, LLC., covered the historical regulation of non-biologic and non-vaccine natural drugs, its evolution, and issues facing further research and development of compounds in this arena.

Continued on next page...
Dr. Linda Doody of CCS Associates mined her extensive experience in reviewing the requirements for regulatory approval of INDs and NDAs. All of the participants agreed that the meeting was entertaining, authoritative, and look forward to Foundation/STP collaborative presentations in future meetings. Additionally, Toxicologic and Environmental Pathology Division Director Zadok Ruben and Foundation President Bruce Williams had an excellent session comparing notes with the STP’s Executive Council and charting plans for future collaborations in the growing area of international toxicologic pathology education. As part of the discussion, the STP Education committee established a permanent position for a C.L. Davis liaison to insure that lines of communication between the two organizations remain open and we look forward to many years of successful interaction.

ON THE ROAD “DOWN UNDER” IN 2007

Each year, a series of technical workshops are put on by the Australian Animal Pathology Standards program to provide continuing education to veterinary pathologists. This year the AAPS together with the CL Davis Foundation sponsored a 2-day technical dermatopathology workshop in six venues across Australia. This was the first year to highlight diagnostic pathology of companion animals. Foundation faculty member Dr. Elizabeth Mauldin (a double boarded diplomate in anatomic pathology and clinical dermatology) presented a 2-day program to over 100 practicing veterinary pathologists focusing on various inflammatory skin disorders of dogs, cats and horses culminating in a final “Master Class” lecture where pathologists could test the skills acquired during the workshop using a palate of routine skin biopsy submissions. The participants represented the majority of working pathologists in government, private and university practice in Australia – a large country the size of the USA with a population of just 20 million. The courses required three weeks to present in April and May 2007 and required Elizabeth to circumnavigate Australia by air. The first leg of the tour was hosted by Dr. Tony Ross at the Attwood Victorian Institute of Animal Science in Melbourne. “She was terrific” said Dr Tony Ross, Director of the Australian Division. “Feedback was very positive.” This was followed by a lovely and relaxing weekend of wine tasting in the beautiful countryside of Frankston at the home of Tony and his wife Maggie.

The road show headed to South Australia (hosted by Stephen Yeomans) and then crossed the continent to the Northern Territory. At the Berrimah Veterinary Laboratory in Darwin, the smallest venue, Dr. John Humphreys and Lorna Melville entertained long conversations of pearl oyster farming, viral diseases and disorders of crocodiles amid a warm tropical climate. In Western Australia, the host was Dr. Barry Richards; the workshop was attended by a diverse group of pathologists from government, industry, and Murdoch University. Dr. John Jardine facilitated lively discussions of diagnostic pathology in this venue. The last legs of the tour were New South Wales (hosted by Drs. Keith Walker and Peter Windsor) and finally Brisbane, with host Ian Wilkie. Somewhere along the grueling itinerary, Dr. Mauldin even managed to squeeze in a terrific weekend of world-class rock climbing in the Blue Mountains of New South with famous Australian climber Michael Law.

The Foundation wishes to thank Dr. Tony Ross and the participants at each facility, as always, for hosting our faculty member in a truly outstanding fashion, coordinating this phenomenal program, and we look forward to 2008, where Dr. Steven Weisbrode will be taking his show “on the Australian road” to discuss pathology of bone.
Dr. Donald Meuten, DVM and Dr. Mary Anna Thrall, DVM bring their heralded one-day cytology workshop to the Tufts Cummings College of Veterinary Medicine. This short course and wet lab is designed for the pathologist or skilled clinical practitioner that wants to acquire or expand their skills in diagnostic cytology. The lectures in this eight-hour symposium include a general approach to evaluating cytologic preparations, recognition of various preparation artifacts, and the interpretation of a wide array of specimens including inflammatory and infectious lesions, neoplasms, and bone marrow, as well as tips on crafting an appropriate written description for a cytologic specimen. A portion of the program will consist of projection of actual cytologic slides with real-time interpretation and a group discussion led by the faculty. Attendees are encouraged to bring their own interesting cases for review and group discussion. Drs. Meuten and Thrall have presented this symposium at a number of venues both for clinicians and pathologists alike, to rave reviews.

A sampling of reviews from their cytology workshop at the recent ACVP meeting in Tucson:

- "This was the best symposium I have ever attended! Kudos to the planners and the speakers"
- "Both presenters gave excellent presentations—easy to follow and full of practical tips."
- "A great presentation given with the insight that only true professionals can impart. A pleasure to attend"
- "Great presentations: didactic, entertaining, practical and useful"
- "A great double act!...LOVED the point-counterpoint repartee between Don and Mary Anna. Made talk much more fun and interesting."

TUITION: $125.00

For more information, visit the C.L. Davis website at: http://www.cldavis.org/courses/upcoming.html#cytology
EUROPEAN DIVISION PATHOLOGY SYMPOSIUM

**Date:** August 27-29, 2007  
**Location:** Munich, Germany  
**Primary Subjects:** Advanced Techniques in Pathology; Diagnostic Cytology; Immunopathology; Mammary and Odontogenic Tumors in Domestic Animals  
**Program Director:** Dr Elizabeth McInnes, HLS, Woolley Road, Alconbury, Cambs, PE28 4HS, United Kingdom,  
Tel: +44 (0) 1480 89 2716, Fax: +44 (0) 1480 89 3033, Email: McInnesE@UKOrg.Huntingdon.com

**TUITION:**  
Please see registration form.

**ACCOMMODATION AND CONFERENCE FACILITIES:**  
The conference will take place at the University of Munich, Plenary A14, immediately preceding the ESVP meeting. Please book a room at the Park Hotel Schwabing on [http://www.parkhotel-schwabing.de/](http://www.parkhotel-schwabing.de/), which has a variety of rooms at different prices.

**C. L. DAVIS EUROPEAN DIVISION TRAVELLING SCHOLARSHIP AWARDS:**  
The C.L. Davis European Division has funds to sponsor three awardees to attend the European Division Pathology Symposium. The award will comprise a grant of 300 euros towards the cost of travel and accommodation. There will be no registration fee. These scholarship awards are open to veterinary pathologists in training in European Veterinary Schools or Research Institutes. Preference will be given to applicants who are studying for higher degrees or who wish to gain further qualifications in pathology.

Applicants should send a Curriculum Vitae giving full details of their pathology experience and career plans together with a nomination by their Head of Department to:

**Prof. Alun Williams**  
Dept of Veterinary Pathology and Infectious Diseases  
Royal Veterinary College  
Hawkshead Lane  
North Mymms  
Hatfield, Hertfordshire AL9 7TA  
United Kingdom  
Tel: +44 (0)1707 666572  
Fax: +44 (0)1707 666298

SOUTHCENTRAL DIVISION 17th ANNUAL MEETING

Date: October 5-6, 2007
Location: Galveston Island, Texas
Program Director: James O. Britt, DVM, Livestock & Poultry Commission Lab, 1 Natural Resources Dr, Little Rock, AR 72205, Tel: (501) 907-2435 and e-mail jbritt@arlpc.org
Keynote Lecture: “Primate Pathology” - Joe H. Simmons, DVM, PhD, DACLAM, Director of Diagnostics, Charles River Labs

The Charles Louis Davis, D.V.M. Foundation will present the 17th Annual Program of the Southcentral Division for members and guests, Friday and Saturday, October 5 & 6, 2007 at The San Luis Resort, Spa and Conference Center, Galveston Island, Texas (http://www.sanluisresort.com). The registration contribution will include a group Friday lunch and dinner, a CD-ROM of the meeting results and the Atlas of Metazoan Parasites in Animal Tissues by CH Gardiner and SL Poynton and the 2008 membership for current non-members and 10 hours on CE credit. Families are welcome to join us for the dinner. Attendees are also invited to present a 15-minute report to the group on an interesting case. Please send 40+ (50 if possible) stained microslides with case information (and diagnosis, comments, applicable references on a separate page) for redistribution to participants by September 10th.

Local Arrangements: Dr. James Britt (501) 907-2435; E-mail: jbritt@arlpc.org
Location and Lodging: The San Luis Resort, Spa & Conference Center, 222 Seawall Boulevard, Galveston, TX 77551 Tel: (800) 445-0090 $132.00 single or double (Reserve by 9/6/07) (ask for “C.L. Davis”) Tuition: Members: $175.00, Non-members: $250.00, Extra Dinner Guests/Spouses: $ 35.00
Slide sets to:

Dr. Barbara Lewis
Texas Veterinary Medical Diagnostic Laboratory
1 Sippel Road
College Station, TX 77841-3040
Phone (979) 845-3414, E-mail: BLEWIS@TVMDL.TAMU.EDU

“This program was reviewed and approved by the AAVSB RACE program for continuing education. Please contact the AAVSB RACE program at race@avasb.org should you have any comments/concerns regarding this program's validity or relevancy to the veterinary profession. “ For more information and registration form visit: http://www.cldavis.org/courses/upcoming.html#11

AABP/CLD SEMINAR: BOVINE PATHOLOGY FOR THE PRACTITIONER

DATE: September 19, 2007
LOCATION: AABP Annual Meeting, Vancouver, Canada
PROGRAM DIRECTOR: Claus Buergelt, DVM, University of Florida, College of Veterinary Medicine Dept of Infectious Diseases and Pathology, Box 110880, Gainesville, FL 32611 352-392-4700 ext 3924 (work), 352-392-9704 (fax), E-mail: Buergeltc@mail.vetmed.ufl.edu

The Seminar is co-sponsored by the Charles Louis Davis Foundation for Advancement of Veterinary Pathology and the American Association for Bovine Practitioners.

DESCRIPTION: This day-long symposium will provide the bovine practitioner with real-world, practical knowledge concerning the diagnosis of pathologic conditions in cow and calf diseases. The experience will be invaluable for those practitioners occasionally facing the prospect of making provisional diagnosis following field necropsies. The seminar will concentrate on gross necropsy findings, establishment of an appropriate differential diagnosis for common conditions, and occasionally, some microscopic findings integral to diagnosis.

The symposium will conclude with a group discussion of challenging case scenarios to reinforce the important diagnostic principles of the day.

CLD/AAVLD JOINT MEETING ON DIAGNOSTIC ORTHOPEDIC PATHOLOGY

Date: October 19, 2007
Location: John Ascuaga's Nugget, Reno, NV
Program Director: Matti Kципel, DVM, PhD, Assistant Professor, Michigan State University, 4125 Beaumont Rd 152A, Diagnostic Centers for Population & Animal Health MSU, Lansing, MI 48910, (517) 432-2670 and e-mail kiupel@dcpah.msu.edu

The Charles Louis Davis DVM Foundation will be conducting an eight-hour continuing education symposium entitled “Diagnostic Orthopedic Pathology” on October 19, 2007.

GUEST LECTURES: Roy Pool (Texas A&M University), and Steven Weisbrode (The Ohio State University).

The following topics will be covered: bone-specific reactions to injury including normal and altered endochondral ossification (eg. osteopetrosis, growth retardation lattice etc.), normal bone modeling and adaptation to altered mechanical use, normal bone remodeling and diseases of imbalanced remodeling (eg. osteoporosis, osteosclerosis etc.), normal woven bone in development of cortical bone and responds of the periosteum to injury; from radiographs to morphological diagnosis including necropsy bone/joint tissue specimen selection and expedient processing for diagnostic slides, needle/trephine biopsy site selection, processing and common errors, radiographic features that help distinguish between benign and malignant processes and interpretation of common bone diseases based on examination of growth plates; tumors and tumor-like diseases of bones, joints and tendon sheaths, articular cartilage and pathogenesis of joint diseases, role of the vasculature in bone, cartilage in the pathogenesis of bone and joint infection. Didactic lectures will be combined with audience participation to result in an engaging day-long seminar. CL Davis is an approved CE provider. Don’t miss out on what promises to be another exciting C.L. Davis/AAVLD co-sponsored symposium.

TUITION of $125 includes refreshments, CD of presentations and continuing education credits. The tuition fee will be waived for the winners of the travel award. Please pre-register to guarantee receipt of materials. Registration is through C.L. Davis and is separate from meeting registration fees. Additional information and registration materials are available at the: CLDavis Foundation Web site: http://www.afip.org/CLDavis or call 847-367-4359.

"This program was reviewed and approved by the AAVSB RACE program for continuing education. Please contact the AAVSB RACE program at race@aaavsb.org should you have any comments/concerns regarding this program's validity or relevancy to the veterinary profession."

PATHOLOGY OF THE LIVER - WHAT'S NEW AND WHAT'S STILL TRUE
Cosponsored by Aperio Technologies Inc., and WIL-Biotechnics

Date: November 10, 2007
Location: The Westin Savannah Golf Resort and Spa, Savannah, GA
SPEAKERS: John M.Cullen, VMD, PhD, North Carolina State University CVM
Thomas J. Van Winkle, VMD, University of Pennsylvania CVM

SYMPOSIUM: The session will review and discuss the histopathology and pathogenesis of liver disease in animals. Contemporary diagnostic terminology, including advances in the recent World Small Animal Veterinary Association monograph on standardization of histologic diagnosis of the dog and cat will be emphasized. Topics covered will include congenital vascular disorders, diseases of the biliary tract and hepatic parenchyma, and hepatic neoplasia. For additional information about the program or sponsorship opportunities, contact Program Director, Sarah Hale (shale@epl-inc.com), or Foundation President, Bruce Williams (williams@cldavis.org).

TUITION: $150 for the day-long seminar, and includes 8 hours of RACE-accredited CME, syllabus, refreshments, and a copy of the WHO Fascicle on Tumors of the Gastrointestinal Tract of Domestic Animals. You may register for this workshop as part of your ACVP registration (http://www.acvp.org/meeting), or if you are only going to Savannah for this meeting, you may register at http://www.cldavis.org/courses/2007savannah.registration.htm
FIRST SEMINAR OF THE ARGENTINE SUBDIVISION
TOPICS IN SMALL ANIMAL MEDICINE

Date: November 29, 2007
Location: Faculty of Veterinary Sciences, La Plata, Argentina
Program Director: Eduardo Gimeno, Facultad de Ciencias Veterinarias, Universidad Nacional de La Plata, Teléfono: +54 - 221 - 423-6663/4 Interno 426 Fax: +54 - 221 - 425-3276 / 7980 E-mail: ejgimeno@fcv.unlp.edu

The Charles Louis Davis Foundation (http://www.cldavis.org/) will organize an eight-hour seminar symposium entitled “Topics in Small Animal Medicine” on November 29, 2007. Course Director Eduardo Gimeno (La Plata University, Argentina) and invited guest lecturers Guillermo Couto (Ohio University, USA), and Pablo Gómez Ochoa (Zaragoza University, Spain). The Seminar will present relevant up-to-date topics in Small Animal Medicine. This will be the first regular activity of the Argentine Subdivision of the CLDavis Foundation leading to the establishment of an International Study Centers of the Foundation in Argentina. The Seminar will take place at the University of La Plata, immediately preceding the Third Forum for Teaching of Veterinary Pathology.

TUITION:
Of $25.00 (around 80.00 Argentine pesos). The tuition fee will be directed to establish an ChLDavis International Study Center in Argentina. Additional information is available at the CL Davis Foundation Web site: http://www.cldavis.org/.

THIRD FORUM FOR TEACHING OF VETERINARY PATHOLOGY
COSPONSORED BY THE ARGENTINE SOCIETY FOR VETERINARY PATHOLOGY

Date: November 30, 2007
Location: Faculty of Veterinary Sciences, La Plata, Argentina

The Forum for Teaching of Veterinary Pathology has been previously held in Rosario (2003) and Buenos Aires (2005). It is a meeting for teachers and researchers with the objective to analyse the evolution of Veterinary Pathology education in Argentina. In the third edition we will have Dr. Bruce H. Williams (AFIP Dept. of Telemedicine &. Distance Learning, Washington, USA) as invited guest lecturer.

Additional information is available at the CL Davis Foundation Web site: http://www.cldavis.org/, by mail to ejgimeno@fcv.unlp.edu.ar, or eduardo.gimeno@cldavis.org. By phone: 54 221 423 6663.

PATHOLOGY OF GENETICALLY ENGINEERED RODENTS
AND AQUATIC SPECIES, AN INTRODUCTION TO PHENOTYPING

Date: July 25-27, 2007
Location: Covance Laboratory Learning Center, Madison, WI
Program Director: Corey Brayton, DVM, Comparative Med S-115, Johns Hopkins University, 733 North Broadway, BRB Ste 851, Baltimore, MD 21205, (443) 287-2953 and e-mail cbrayton@jhmi.edu

The C.L. Davis Foundation, Comparative Pathology Division, announces a new annual symposium: Pathology of Genetically Engineered Rodents and Aquatic Species, an Introduction to Phenotyping, July 25-27, 2007, at the Covance Laboratory Learning Center, Madison, WI. This new symposium targets veterinarians, pathologists (MD, DVM, VMD) and scientists who are becoming more involved in the phenotyping aspects of functional genomics initiatives in rodents and zebra fish. Common pathologic findings (phenotypes) that are relevant to identifying and validating new or induced phenotypes will be emphasized. The intensive 3-day program includes an evening poster session on phenotypes and phenotyping strategies, and an evening virtual microscopy slide conference. Registrants are invited to submit relevant abstracts for the poster session, and/or a glass slide to be presented in the slide conference (submission instructions below).

Tuition: $300 for Foundation members, $375 for non-members (includes membership in the C.L. Davis Foundation).

Syllabus: Electronic handouts will be provided to participants via CD-ROM and will also be downloadable from the Davis Foundation Website (http://www.cldavis.org/courses/upcoming.html#10) in advance of the program. Printed handouts will be available at the conference for an additional $50 payable with tuition.

"This course has been submitted (but not yet approved) for 22 hours of continuing education credit in jurisdictions which recognize AAVSB's RACE approval; however participants should be aware that some boards have limitations on the number of hours accepted in certain categories and/or restrictions on certain methods of delivery of continuing education. Call Dr. James Britt, 501-907-2435 for further information".
