The Southcentral Division held its annual meeting on the Texas A&M Galveston campus October 2-3, 2015. Twenty-one excellent cases were presented. Dr. Britton Grasperge of Louisiana State University presented the guest lecture, Cytology Simplified: a systemic guide to thorough descriptions. Dr. Fabio del Piero, also of LSU, gave a 60-question mock gross exam on pulmonary pathology. We had twenty-seven participants including residents and faculty from Texas A&M, LSU, M. D. Anderson Cancer Center, Southern Illinois University, the Southwest National Primate Research Center, Antech, and the Texas A&M Veterinary Medical Diagnostic Laboratory. Our group dinner was enjoyed at Landry’s Seafood Restaurant on the Galveston Seawall where several long term members including Dr. Joe Scimeca reminisced on the division’s early beginnings. The Southcentral Division is looking forward to another 25 years of excellent continuing education and camaraderie on picturesque Galveston Island.

AAVLD Slide Sets Available for Purchase!

Limited numbers of glass slides sets from the AAVLD Diagnostic Pathology Slide Seminars (2011-2014) are available for purchase! A listing of diagnoses for the slides within each set can be viewed [here](#). You may obtain one or more of the sets by submitting an order form to the AAVLD Secretary-Treasurer. ([Click here](#)). Proceeds generated from sale of slide sets will be used for pathology resident/graduate student travel awards. All sets are available for **$50 per set plus shipping**. Please contact Dr. Rob Bildfell (Rob.Bildfell@oregonstate.edu) if you require further information.

Retiring? Have slides left over from your recent slide seminar? Just looking to free up some storage space? **The Foundation is looking for additional glass slides, kodachromes and other similar materials** for its Correspondence Division and Study Centers. All materials should be well-identified with as much accompanying history and discussion as possible, as these materials are expressly used for teaching. Moreover, as the Foundation is a publicly donative charity, all donated materials are tax-deductible. For more information, please contact Dr. Bruce Williams at williams@cldavis.org.

Members of the LCPG were busy this year at the Annual meeting of the ACVP in Minneapolis. For the first time, the oral presentations at the LCPG session were in English. This change was brought about in order to make our presentations available to all ACVP attendees. The oral presentations session was held on Monday, October 19, and was a great success. It was well attended by more than 30 people and included an invited presentation by Dr. Maria Lucia Zaidan Dagli, from the University of São Paulo, Brazil, on “Criteria for the safety evaluation of fragrance ingredients: the role of toxicologic pathology” and a presentation by Dr. Monica Ronderos, from the Faculty of Veterinary Medicine, La Salle University, Bogotá, Colombia.

The session of oral presentations was followed by the business meeting of the LCPG, during which our previous Secretary-Treasurer, Dr. Vinicius (Vini) Carreira, stepped down after 4 years of outstanding service (Thank you, Vini!!) and was replaced by the incoming secretary-treasurer, Dr. Francisco Carvallo. A congratulatory plaque was handed to Vini during the meeting. Finally, during the CL Davis Award Ceremony, the LCPG Travel Award was given to the 2015 winner, Dr. Monica Ronderos.

Mouse Models of Disease: Improving Reproducibility of Pathology Endpoints in Challenge Models

9–11 February 2016
Wellcome Trust Genome Campus, Hinxton, Cambridge, UK

This popular conference will bring together veterinary and human pathologists and scientists working with mouse models in academic and industrial research. The programme will review basic approaches to creating and interpreting reproducible mouse pathology data.

A major focus of the 2016 meeting will be the techniques used to investigate the pathology in the respiratory and gastrointestinal tracts in challenged and non-challenged phenotyping studies.

Topics
- Infectious diseases
- Environmental factors
- Infection models
- Nutrition and diet
- Microbiota
- Lung function
- Respiratory disease models
- Imaging and validation
- Reproducibility of lung cancer models
