2018 Northeast Vet Path Conference Focuses on Liver

A packed house enjoys a day of great pathology in Washington

The Northeast Veterinary Pathology Conference returned to MedImmune on 7-8 May 2018 for a standing room only two-day meeting, focusing on Hepatic Pathology. This year’s meeting, which was free to the first eighty pathologists to sign up (we did have to close the course once all seats were full) was once again sponsored by MedImmune, the Joint Pathology Center, Charles River Laboratories, and Novartis. Participants listened to Dr. John Cullen, Alumni Distinguished Professor of Pathology at North Carolina State University, and internationally renowned specialist in veterinary hepatic pathology, present on “The Liver Biopsy, The Pathologist’s Perspective” as well as “Hepatic Neoplasia”.

Twenty-five outstanding case presentations were given over the 1.5-day course, many focusing on both classic and unique diseases of the hepatobiliary system, with Dr. Cullen providing excellent insight from his many years of specialty experience in this system. This year’s meeting marks the third and last time for Course Director MAJ Erin Ball of the Joint Pathology Centers, whose attention to detail over the three years has been second to none, from ensuring an outstanding program as well as outstanding breaks and lunch (and a dinner social) for the participants over the two day program. MAJ Ball is going on to UC Davis to obtain her Ph.D. in pathology – and they are extremely fortunate to have her.
This year’s lunch was Mediterranean and greatly appreciated by the attendees. We also wish to thank local host (again for the third time) Dr. Lily Cheng of MedImmune without whom this course would not be such an awesome success. Participants even got to catch a bit of the cherry blossoms downtown after the noon end of the meeting on Sunday.

One more lecture on the pathology of the horseshoe crab by the Joint Pathology Center’s Elise LaDouceur, is also available online.

We look forward to next year’s meeting, which will focus on Cardiovascular Pathology – so start looking for interesting cases now, and watch the Foundation’s social media for announcement of the date!

From Bruce Williams  
CEO, Davis-Thompson Foundation
Davis-Thompson Foundation Pathology Externship

Since 1980, the Davis-Thompson Foundation lab sites have hosted more than 125 veterinary students at 8 participating diagnostic laboratories. These students usually have a strong interest in pathology itself or zoo or poultry medicine that require a strong pathology background. The Foundation is always interested in having veterinary students apply for an externship and we would like to add more externship sites that do not usually have veterinary students, to help increase their interest and knowledge of pathology with some off-campus experience. For more information, contact Dr. Jim Britt, jobritt@sbcglobal.net; 501-912-1449.

Retiring?

Have slides left over from your recent slide seminar? Just looking to free up some storage space? The Foundation is looking for additional glass slides, kodachromes and other similar materials for its Correspondence Division and Study Centers. All materials should be well-identified with as much accompany history and discussion as possible, as these materials are expressly used for teaching. Moreover, as the Foundation is a publicly donative charity, all donated materials are tax-deductible. For more information, please contact Dr. Bruce Williams at williams@cldavis.org.

From the Davis-Thompson Foundation Store

What is the largest selling book ever in veterinary pathology?

You may not know this, but John King’s Necropsy Book (now in its fifth edition) has sold more copies around the world than any other book in our specialty. Pocket-sized and packed with down-to-earth knowledge when you need it (right there on the necropsy floor), it is a must-have for every pathologist and pathologist in training. This edition contains things that you won’t find in any other pathology textbook – the best autopsy techniques, classic “non-lesions” encountered in various species, even characteristic smells encountered with certain diseases, and all for only $40 (plus $8 for international shipping). To order, visit http://store.cldavis.org or call 1-847-367-4359.

Diagnostic Exercise
From The Davis-Thompson Foundation*

Case #: 89  Month: January  Year: 2018

Contributors: Rahul B. Dange, Anatomic Pathology Resident, Mark Anderson, DVM, PhD, DACVP, California Animal Health and Food Safety Laboratory System, School of Veterinary Medicine, UC Davis, 620 W Health Science Dr, Davis, CA.

Clinical History: Three near term aborted goat foeti with respective placentas were submitted from a goat farm with a history of multiple near term abortions.

Necropsy Findings: Two of the three placentas had gross changes. There were numerous, 1-3 mm in diameter, gray white, circular foci in the cotyledons with occasional thickening of the pericotyledonary region with a soft gray exudate. No other remarkable gross lesions were seen the fetal tissues.

Follow-up questions: Morphologic Diagnosis, microscopic findings, cause.

Answers and more info [here](#)

*The Diagnostic Exercises are an initiative of the Latin Comparative Pathology Group (LCPG), the Latin American subdivision of The Davis-Thompson Foundation. These exercises are contributed by members and non-members from any country of residence. - Consider submitting an exercise!

6th EXPO PATVET
1st Paraguayan Seminar of the CL Davis – SW Thompson Foundation
20 and 21 September, 2018
Facultad de Ciencias Veterinarias – Universidad Nacional de Asuncion
San Lorenzo – Paraguay

Program

Thursday September 20, 2018

Morning
-Case presentation by third year vet students
Afternoon
-Gross description and morphological diagnosis
Francisco A. Uzal, DVM, FRVC, MSc, PhD, Dipl. ACVP
California Animal Health and Food Safety Laboratory System - San Bernardino Branch- University of California, Davis

Friday September 21, 2018

Morning
-Pathology of the alimentary system
Francisco A. Uzal, DVM, FRVC, MSc, PhD, Dipl. ACVP
California Animal Health and Food Safety Laboratory System - San Bernardino Branch- University of California, Davis
Afternoon
-Pathology of the respiratory system
Francisco R. Carvallo, DVM, DCs, Dipl. ACVP
California Animal Health and Food Safety Laboratory System - San Bernardino Branch- University of California, Davis

JOHN KING’S “NECROPSY SHOW AND TELL” IMAGES NOW IN NOAH’S ARKIVE

Thanks to Cornell University College of Veterinary Medicine, we are happy to announce that Dr. John King's Necropsy Show and Tell image collection is now available via Noah's Arkive, adding approximately 16,500 additional images. We would also like to thank Dr. Mike Dark of the University of Florida, our Foundation Web Administrator for facilitating this image transfer.

While Dr. King’s passing two years ago dealt a great blow to veterinary pathology around the world, we are extremely proud that his life’s work in pictures, will continue to live on through the Arkive. Dr. King, a giant in veterinary pathology, a founding member of the Foundation, and author of “The Necropsy Book” and “50 Years at the Necropsy Table” has left behind an immense legacy – not only the legions of students who learned at his side, but a pictorial history of his career of images that already populate lectures around the world. These images will now permanently reside as part of the Noah’s Arkive collection, adding immensely to the largest online freely available collection of images in the world.

If you would like to specifically look for Dr. King’s images, simply search on JKNST, and your search will retrieve them in toto.

But Noah’s Arkive is far from finished. We continue to look for additional outstanding images (which are added each day) as well as contributors and curators to continue to improve Noah’s Arkive. While we continue to take a wide range of uploaded images directly from our contributors as well as kodachromes from contributors who are retiring or simply looking to free up some space, we also will accept large transfers of digitized and catalogued images, such as Dr. King’s.

If you would like to help with this important project, please contact Foundation President Dr. Bruce Williams.

From Bruce Williams
President, Davis-Thompson Foundation
2018
Day-Seminar on Zoo and Exotic Animal Pathology
Laboratory of Pathology, School of Veterinary Medicine
Aristotle University of Thessaloniki, Greece
May 20, 2018, 8:30am-6:15pm

Dr. Michael Garner, DVM, DACVP

SCHEDULE
8.30-9.00 Registration
9.00-11.00 Selected diseases of small zoo and pet mammals
11.00-11.15 Coffee break
11.15-13.15 Trends in neoplasia for zoo felines
13.15-14.00 Lunch
14.00-16.00 Selected diseases of zoo and pet birds
16.00-16.15 Coffee
16.15-18.15 Selected diseases of zoo and pet reptiles

Tuition is 20 Euros and is payable at the door.

Lab Animal Pathology Seminar

ONE DAY SEMINAR
$100 per attendee
No early bird prices.
Please register as an individual, NOT as an organisation.

LOCATION
Children’s Medical Research Institute,
214 Hawkesbury Rd, Westmead, NSW

REGISTRATION CLOSES
June 29, 2018

INVITED GUEST SPEAKER
Dr. Bruce Williams is the Senior Pathologist in the Veterinary Pathology division at the Joint Pathology Center (formerly the Armed Forces Institute of Pathology). With over 25 years of experience in the areas of diagnostic and laboratory animal pathology, Dr. Williams is known around the world as the CEO of the Davis-Thompson Foundation (the largest organisation promoting veterinary and comparative pathology worldwide), and Director of over 100 courses in descriptive, gross and lab animal pathology.

- Learn how to recognise and interpret lesions in common laboratory animals.
- Seminar will cover a wide range of diseases mainly in rats, mice, rabbits and guinea pigs, but also in pigs and non-human primates, including infectious, neoplastic, iatrogenic, nutritional and metabolic conditions in various laboratory animal species.
- Emphasis will be on pathology, but etiology, diagnosis and control will also be covered.

For more information and online registration, please visit cmri.org.au/Events/Lab-Animal-Pathology

My visit to California Animal Heath and Food Safety Laboratory (CAHFSL), San Bernardino, California

Located in the Inland Empire region of Southern California, the San Bernardino laboratory provides livestock, equine and avian necropsy, histopathology, immunohistochemistry, bacteriology, parasitology, serology and mammalian virus detection testing on site.

I was excited when I learned from Dr. Jim Britt that there is a student externship program for international veterinary students under Davis-Thompson Foundation Pathology Externship program during my first email communication. He took lot of pain and was so articulate in finding laboratory for me to work. It is nothing but his efforts that I could get such a wonderful working experience under renowned Pathologist, Dr. Francisco Uzal at CAHFSL, San Bernardino. I cannot thank him enough to even provide me with stipend for my stay in United States. CAHFSL is a great haven of learning for an undergraduate student from developing country like India who is aspiring her career in Veterinary Pathology. I was more than overwhelmed when the Branch Chief, Dr. Uzal sent me a letter inviting me to the lab for Pathology Externship Program.

Over the period of a month, I learnt the procedures of necropsy for different species of animals including horses, donkeys, dogs, cattle, raccoons, goats, alpacas and chickens, occasionally Gerenuk. I also learnt how to interpret and diagnose histopathological slides. I also got the opportunity for attending their Biopsy Conferences and Case Discussion Conferences, which are conducted on every Friday and Tuesdays, during which all the aspiring pathologists and established pathologists respectively all over the CAHFS Lab put up their cases for discussion. The Gross Rounds and Histopathology Rounds conducted on every Thursdays were the ones to look forward to, where all the Pathologists at the lab present those cases for discussion which they find interesting and listen to everyone’s point of view.

In summary, the trip was successful in the way that I learnt many things, which may not be possible for me during my undergraduate studies in India. Besides the visit, I also heard the success stories of the Pathologists working in the Laboratory, which inspired me to my core and gave me hopes to become one of them in future. I would like to thank Davis-Thompson Foundation to make this trip possible and providing me a comfortable environment. I look forward for such visits in future.

Sayali Kohale
4th Year Veterinary Medical Student
Bombay Veterinary College, MAFSU, India
On Abril 19\textsuperscript{th}, the Davis/Thompson Foundation and the Faculty of Veterinary Sciences of the University of Chile hosted a 3-hour wonderful seminar by Dr. Eric Lombardini on marine mammals and turtle pathology in Santiago de Chile. This opportunity was the result of a joint effort of Dr. Eric Lombardini, who offered to give a talk while visiting Chile, and Dr. Federico Cifuentes, Professor of Anatomic Pathology at the Faculty. The seminar gathered 120 people including veterinary pathologists, veterinary graduate and postgraduate students, marine biologists and professionals working in NGOs and in the National Fisheries Service (SERNAPESCA). In addition, 190 people from the US, Mexico, Argentina and Brazil watched the live streaming in YouTube (video is still available). With a 4000 km long coast, Chile has a wide variety of marine animals making these talks a necessity and a welcomed instance.
