Dr. Donald Meuten Rocks the 2018 ACVP Workshop

Don Meuten, emeritus professor of the North Carolina State University College of Veterinary Medicine as well as editor of Moulton’s Tumors of Domestic Animals, delivered an absolutely riveting tour de force at the Diagnostic Pathology Workshop at the 2018 meeting of the American College of Veterinary Pathologists.

Dr. Meuten, a legend in both anatomic and clinical pathology, combined both in a detailed review of endocrine pathology, beginning with the parathyroid gland, continuing with the thyroid gland, adrenals, and ultimately the pituitary and endocrine gland. More than just a collection of lesions and enlarged or shriveled glands, like so many endocrine lectures, Dr. Meuten reviewed all of the appropriate testing protocols, old and new. Even more importantly, his many years of experience allowed him to teach us all which tests are important for a particular diagnosis, and which are just filler in textbooks and dusty journals.

Continued on page 2...
Many retired professors retire to a beautiful home on a hill with 15 horses, never looking back. Not so Don Meuten – he came down from that mountain, not only with years of experience to impart, but absolutely up-to-date with the latest information from the most recent studies. And it wasn’t just a recitation of data and findings from journals and epubs – for an hour before lunch he held court on the way we currently analyze data and publish findings – and what makes the difference between a good study and a questionable one. He illustrated the pitfalls inherent in many papers today and armed the audience with the tools to evaluate the study itself, not just parrot its findings.

And for a brief six hours, we got to watch a brilliant mind at work – delivering information at a fever pitch, far faster than we could possibly absorb it, and punctuating it with a sense of humor that kept the audience even more impossibly entertained. It was a masterful lecture, a wonderful performance, and a demonstration of what makes Don Meuten so special.

Be sure not to miss our 2019 ACVP workshop already in the works with “The 3 M’s of Pathology – melanomas, mammary tumors and Michael Goldschmidt”.

Bruce Williams

Dr. Meuten lectures to a large crowd at the Diagnostic Pathology Workshop at the 2018 meeting of the American College of Veterinary Pathologists
Davis-Thompson Foundation Pathology Externship

Since 1980, the Davis-Thompson Foundation lab sites have hosted more than 125 veterinary students at 8 participating diagnostic laboratories. These students usually have a strong interest in pathology itself or zoo or poultry medicine that require a strong pathology background. The Foundation is always interested in having veterinary students apply for an externship and we would like to add more externship sites that do not usually have veterinary students, to help increase their interest and knowledge of pathology with some off-campus experience. For more information, contact Dr. Jim Britt, jobritt@sbcglobal.net; 501-912-1449.

Retiring?

Have slides left over from your recent slide seminar? Just looking to free up some storage space? The Foundation is looking for additional glass slides, kodachromes and other similar materials for its Correspondence Division and Study Centers. All materials should be well-identified with as much accompany history and discussion as possible, as these materials are expressly used for teaching. Moreover, as the Foundation is a publicly donative charity, all donated materials are tax-deductible. For more information, please contact Dr. Bruce Williams at williams@cldavis.org.

From the Davis-Thompson Foundation Store

What is the largest selling book ever in veterinary pathology?

You may not know this, but John King’s Necropsy Book (now in its fifth edition) has sold more copies around the world than any other book in our specialty. Pocket-sized and packed with down-to-earth knowledge when you need it (right there on the necropsy floor), it is a must-have for every pathologist and pathologist in training. This edition contains things that you won’t find in any other pathology textbook – the best autopsy techniques, classic “non-lesions” encountered in various species, even characteristic smells encountered with certain diseases, and all for only $40 (plus $8 for international shipping). To order, visit http://store.cldavis.org or call 1-847-367-4359.
Diagnostic Exercise
From The Davis-Thompson Foundation*

Case #98: Month: June Year: 2018

Contributors: Devika Bahal1, DVM, MS; Tatiane Terumi Negrão Watanabe2, DVM, MS, PhD; Emi Sasaki2, DVM; Kyra Berg3, BA, DVM; Javier Nevarez3, BS, DVM, PhD, DECZM, DACZM; Ingeborg M. Langohr2, BS, DVM, MS, PhD, DACVP. 1Bombay Veterinary College, Mumbai, India. 2Louisiana State University School of Veterinary Medicine, Department of Pathobiological Sciences and Louisiana Animal Disease Diagnostic Laboratory, Baton Rouge, LA 70803. Louisiana State University School of Veterinary Medicine, Department of Veterinary Clinical Sciences, Baton Rouge, LA.

Clinical History: A 2-year-old female chicken in good body condition was submitted for necropsy after euthanasia with a clinical history of lethargy, abnormal behavior, ruffled feathers, and loose stool. History available from the year before indicated the possible presence of a mass in the coelom. An ultrasound-guided aspirate revealed opaque, thick fluid from the suspected mass within the coelomic cavity. The flock, which is vaccinated against Marek’s disease, had one chicken recently die due to neoplasia of the reproductive tract.

Macroscopic findings:

Follow-up questions: Morphologic diagnoses and Histologic characteristics.

Answers and more info here!

*The Diagnostic Exercises are an initiative of the Latin Comparative Pathology Group (LCPG), the Latin American subdivision of The Davis-Thompson Foundation. These exercises are contributed by members and non-members from any country of residence. - Consider submitting an exercise!

Wildlife Health and Pathology Short Course & Translocation Health Symposium
18 - 23 February 2019, Sydney

The Australian Registry of Wildlife Health, supported by the Cybec Foundation and CL Davis Foundation, is hosting a Wildlife Health and Pathology Short Course, followed by a one-day Translocation Health Symposium.

The Short Course provides an intensive, detailed review of the health and diseases of each taxonomic group of wildlife: birds, mammals, reptiles, amphibians and aquatic animals. Hot topic presentations on emerging diseases impacting wildlife conservation, and gross and histopathology rounds bring these reviews to life.

The Translocation Health Symposium will highlight the many disciplines of translocation science including ecology, nutrition, behaviour, welfare, and disease risk analysis. Panel discussions will provide an opportunity for engagement and the exchange of ideas and best practice.

Each fascinating program will be delivered by expert educators, including internationally acclaimed wildlife pathologists Drs Judy St Leger (SeaWorld), Bruce Rideout (San Diego Zoo), Michael Garner (Washington State University), Kevin Keel (UC Davis), nutritionist Ellen Dierenfeld (Nottingham Trent University), eminent ecologist Carl Jones (Durrell Wildlife Conservation Trust) and local wildlife specialists.

Registrations are now open!

Course Program, Speaker Bios, and Online Registrations are accessible via the Registry website – https://arwh.org/event/wildlife-health-pathology-short-course-2019

*Applications for scholarships for local graduate student, and wildlife veterinarians from developing countries will be opening soon.

Notice of Future Meetings

CES 1: Toxicology and Pathology
Tuesday 26th - Thursday 28th March 2019
Department of Pathology, Cambridge, UK
Registration for this symposium will open in December 2018
The aim of the second round of Continuing Education Symposiums is to continue providing an interactive environment to enhance your knowledge in the field of toxicological, discovery, clinical, experimental or veterinary pathology. The Continuing Education Symposiums are designed to refresh participants’ knowledge and understanding of core principles, as well as discuss any important recent advances. Future BSTP Continuing Education Symposiums will also focus on specific organ systems. This Continuing Education Symposium will provide a higher-level overview of Toxicology and Pathology, how it integrates with other disciplines and with various phases of drug development and how pathology data is interpreted and communicated (for instance with clinicians and regulatory authorities). Topics to be covered include (but are not limited to): advanced pathology techniques, integration of histopathology and clinical pathology data, animal models in drug discovery, case studies of adverse/non-adverse pathology findings, use of pathology data for risk assessment. The format will include presentations, case histories and active participation of delegates. The Continuing Education Symposium will be of 3 days duration and the programme is arranged such that each individual day can be attended as stand-alone CPD event if desired. More information here.

CES 2: Liver
Tuesday 9th - Thursday 11th July 2019
Department of Pathology, Cambridge, UK
Registration for this symposium will open in spring 2019
The aim of the Continuing Education Symposium is to provide an interactive environment to enhance your knowledge in the field of toxicological, discovery, clinical, experimental or veterinary pathology. The Continuing Education Symposiums are designed to refresh participants’ knowledge and understanding of core principles, as well as discuss any important recent advances. This Continuing Education Symposium will provide an intermediate level symposium on the Liver covering both theory and practical classes including INHAND, rodent and non-rodent liver pathology and risk assessment as well as reviewing challenges with current research models. The format will include presentations, case histories and active participation of delegates. The Continuing Education Symposium will be of 3 days duration and the programme will be arranged such that each individual day can be attended as stand-alone CPD if desired. More information here.

European Workshop on Diseases of Wildlife and Exotic Animals

The Wildlife:Domestic animal interface
Common and emerging diseases

11 - 12 April 2019
Dept. of Animal Science, Universitat de Lleida, Spain

- Gross pathology of wildlife and exotics
- Year in Review- what’s new in pathogenesis and diagnostics?
- Recognizing emerging diseases
- Viral persistence and viral oncogenesis - a wildlife perspective
- Group discussion of participant-supplied cases
- Systemic pathology of exotic species (bone and GI)

1st International Seminar-Workshop on Gross and Microscopic Pathology
Bogotá, 24 and 25 October 2018

The Colombian Association of Veterinary Pathologists (ACPAVET) organized the “First international seminar-workshop on gross and microscopic veterinary pathology” with the sponsorship of the C.L. Davis–S.W. Thompson Foundation and the Latin Comparative Pathology Group (the Latin-American Division of the Davis-Thompson Foundation). The event was held at the National University in Bogota, Colombia, on October 24 and 25, 2018, and it was organized by Drs. Jahnier Caicedo and Lucia Botero.

The keynote speakers were Drs. Francisco Carvallo (University of California-Davis) and Ana Alcaraz (Western University of Health Sciences). Dr. Carvallo presented on descriptive pathology, correlation of gross and microscopic changes, and immunohistochemistry, the latter with emphasis on the diagnosis of tumors. Dr. Alcaraz lectured on veterinary education and cognitive diagnostic errors, as well as diagnostic microscopic pathology and cytology. The program also included presentations by Drs. Paula Esquinas, Ana Maria Henao, Jahnier Caicedo, Giovanny Vargas, Francisco Pedraza, Luis Carlos Veloza and Mauricio Collazos, all highly experienced Colombian pathologists from different national and private institutions.

The course was a complete success and had 120 attendees, including pathologists, veterinary students and practitioners representing the 5 regions of Colombia, and Peru, Panama and Ecuador. Finally, two labs on gross and microscopic pathology were offered. These labs were very well received by the attendees, who were thrilled with the experience and were already anticipating next year’s seminar.

Attendees of the First international seminar-workshop on gross and microscopic veterinary pathology. In the center (front row) Drs Alcaraz and Carvallo, keynote speakers.
Sex in the Wild

Now that we have your attention, this was the title of the annual meeting of The Australian Society for Veterinary Pathology held beachside in Sydney, NSW over September 14-16th 2018. Thirty-five delegates attended the meeting, 'Sex in the Wild: Reproductive and Placental Pathology in Population Health and Conservation.' Keynote speaker, Dr. Dalen Agnew from Michigan State University, led sessions on reproductive and placental pathology, abortion diagnostics and reproductive management of zoo wildlife. These were complimented by member and student presentations, a comprehensive seminar on equine abortion from Dr. Angela Begg, and a fascinating session on the evolution of vertebrate pregnancy from Dr. Camilla Whittington. Dr. Agnew additionally provided delegates with an update on the new format of the ACVP board examination.

The ASVP's annual conference is the most important continuing education and networking event of the year. Dr. Agnew was a lively, exceptional speaker and as with the previous years, the contribution of the Davis-Thompson Foundation in sponsoring his airfare, directly facilitated an outstanding annual meeting. On behalf of ASVP membership, the committee thanks the Foundation for their ongoing support.

Hannah Bender, Committee, Australian Society for Veterinary Pathology
Tony Ross, Director Australian Division Davis Thompson Foundation
The 4th Uruguayan Seminar of the CL Davis – SW Thompson Foundation was held at the Kolping Hotel, Montevideo, Uruguay, the 1st and 2nd of October, 2018. The meeting was organized by faculty of the Department of Pathology, Veterinary School, Universidad de la República (FVET - UdelaR), the National Veterinary Academy, the National Veterinary Laboratories (DILAVE) “Miguel C. Rubino” MGAP, and the National Institute of Agricultural Research (INIA), and sponsored by the CL Davis/SW Thompson Foundation and the Latin Comparative Pathology Group. The Organizing Committee was led by Prof Dr José Manuel Verdes and colleagues of the Department of Pathology (FVET - UdelaR). The seminar was attended by 30 participants, including pathologists, professors, lecturers, undergraduate and postgraduate students and private practitioners from Paraguay, Brazil, Argentina and Uruguay.

Dr Joaquín Ortega Porcel, Universidad CEU-Cardenal Herrera, CEU Universities, Valencia, Spain, was the keynote speaker, and he lectured on Dermatopathology and Oncopathology, introducing wonderful cases which he discussed with the participants.

Dr Fernando Dutra, from DILAVE “Miguel C. Rubino” MGAP, Treinta y Tres, Uruguay, presented several Dermatopathology diagnostic cases in farm animals, Drs Cecilia Menéndez and Alicia Decuadro (FVET - UdelaR), lectured on Clinical diagnosis and treatment of mast cell tumors, and Dr Paula Pessina (FVET - UdelaR), presented on Molecular mechanisms and treatments for canine thyroid carcinoma.

Finally, Drs Juan Carlos Cruz, Claudio Borteiro and Alejandro Crampet presented lectures on Diagnostic cases received at the diagnostic lab of FVET-UdelaR, Cutaneous lesions of wild amphibians, and Soft tissue tumors in venomous snakes, respectively.

This 4th Uruguayan Seminar of the CL Davis – SW Thompson Foundation received financial support from FVET – UdelaR and several private sponsors.
ACTIVITIES OF THE LATIN COMPARATIVE PATHOLOGY GROUP
ACVP ANNUAL MEETING - WASHINGTON DC, 2018

The LCPG was very active during the recent ACVP annual meeting in Washington DC. In addition to all the networking and scientific activities that our members develop, the following formal activities were done:

1-LCPG scientific session
See separate blurb about this session in this issue.

2-LCPG business meeting
This is the regular business meeting of the LCPG which was attended by several members in person and also via phone conference. Several important items such as LCPG committee rosters and recent elections were discussed. Dr Ana Alcaraz stepped down as President of the group after 2 years in this position; she was presented with a plaque of appreciation. Dr Francisco Uzal is the new President of the LCPG and Dr Paola Barato took over as President elect. Drs Leonardo Minatel and Fabio del Piero were also elected as Councilors of the LCPG.

3-LCPG-Davis/Thompson Foundation awards
During the traditional Davis/Thompson Foundation reception the following awards were presented:

Dr Renee Laufer Amorim, Sao Paulo, Brazil for her abstracts:
2. miRNA global gene expression in canine primary mammary carcinoma and in the lymph node metastasis.

Dr Katia R Groch, Sao Paulo, Brazil for her abstract:
Pathology of cetacean morbillivirus and comorbidities in Guiana dolphins during 2017-2018 epidemics (Brazil).

Best Diagnostic exercise 2017-2018
‘3rd Meeting of the CL Davis/SW Thompson Foundation – Peruvian Division: Diseases of cattle’
Universidad Católica de Santa María, Arequipa, Peru, 16 and 17 November 2018

The 3rd Peruvian Meeting of the CL Davis/SW Thompson Foundation: “Diseases of cattle”, was held at the Universidad Católica de Santa María, in Arequipa, Southern Peru, on November 16 and 17 of 2018, immediately before the Congress on Veterinary Medicine and Zooteccnia. The meeting was organized by Drs Fernando Fernandez Fernandez (Universidad Católica de Santa María, Arequipa) and Rosa Perales (Universidad Mayor de San Marcos, Lima), with the help of an enthusiastic group of local colleagues and students. The Universidad Católica de Santa María, the Davis/Thompson Foundation and the Latin Comparative Pathology Group (the Latin American Division of the Foundation) sponsored the meeting.

Dr César Caceres (Vice-Academic chancellor of Universidad Católica) and Dr Carlo Sanz (Dean of the Veterinary School) declared the seminar opened. Dr Claus Buergelt, from the University of Florida, USA, lectured on reproductive and respiratory diseases, Dr Fernando Fernandez, lectured on pathology of bovine liver at the slaughterhouse, and Dr Francisco Uzal, UC Davis, USA, lectured on gross diagnosis, alimentary and clostridial diseases. The presentations by Dr Buergelt were impeccably translated into Spanish by Ms Melisa Green, a 3rd year student of veterinary medicine at Universidad Católica de Santa María. Dr Rosa Perales, President of the Peruvian Subdivision of the Davis/Thompson Foundation, made a presentation about the activities of the Foundation in the world and in Peru.

Nearly two hundred veterinarians and students from all over Peru attended the seminar. The audience participated actively during all the presentations, and many interesting discussions were held between the speakers and the attendees. It was very encouraging to see the great enthusiasm with which a large number of undergraduate and graduate students embraced this seminar and asked endless questions about future careers in veterinary pathology.
The 2018 Davis-Thompson Awards!

The 2018 annual meeting of the American College of Veterinary Pathology provided a large, enthusiastic and appreciative crowd for the Foundation’s annual Awards Reception, where we have the opportunity to honor the best and brightest students, young faculty, and career educators in North American veterinary schools today. Vice President Annette Gendron-Fitzpatrick presided over the festivities, and this year’s awards reception began with Foundation CEO Bruce Williams explaining the absence of food at the reception this year – the Foundation’s Board (and everyone in attendance) agreed that the $5000 quoted for 10 trays of hors d’oeuvres at the Marriott Wardman Park would be better spent sending Dr. Corrie Brown and another volunteer pathologist to the Bangladesh Agricultural University in Mymensingh, Bangladesh for a three-day workshop on poultry pathology. **Dr. Williams then proceeded to memorialize one of the Foundation’s founders, Dr. Howard Hartman, one of the “greatest pathologists that you never heard about”. Dr. Hartman’s daughter, Andrea Hartman Gagnon, was in attendance to hear about all of the wonderful things her father did for the Foundation, for the Society of Toxicologic Pathologists (he was the 4th president) and for veterinary pathology.**

The Foundation’s new President, Dr. Paco Uzal recapped a year of amazing successes in the Foundation, in the areas of traditional courses, online education, the resurgence of the Correspondence Division, and the publication of the first new “tumor fascicle” in a dozen years (with two more to be published within the next year). Immediately following Dr. Uzal’s recap, the Foundation presented its annual Student Scholarship Awards to 32 deserving residents and graduate students from our affiliated universities in North America (another record year for the Foundation). Each awardee received an inscribed plaque. Due to the sheer number of awardees, we have changed from personal introductions from their mentors in past years, to a writeup in the program (and on the Foundation’s Facebook page) and pictures of the awardees with mentors, Dr. Uzal, and a group photo. (A complete list of all awardees is available on page 19 of this newsletter.)

**Dr. Jey Koehler presented this year’s journal scholarship award was won by a member of the Faculty of Discussants and anchor of the Foundation’s POLA and EuroPola meeting, Dr. Tim Cooper, (T.K. Cooper, J.W. Griffith, Z.C. Chroneos, J.M. Izer, L.B. Willing, and X. Peng. Spontaneous Lung Lesions in Aging Laboratory Rabbits (Oryctolagus cuniculus). Veterinary Pathology, Vol. 54, 1: pp. 178-187) in a year of outstanding articles.** The next award (presented by Dr. Williams) was the Barbara Jean Thompson Award for Foundation Service, which went to Dr. Michael Dark of the University of Florida, architect of all of the Foundation’s online initiatives, including Noah’s Arkive, the Foundation’s new virtual slide server, and the many improvements to the Foundation’s website. Then Dr. Ingeborg Langohr of Louisiana State University, one of the editors of the Foundation’s **Diagnostic Exercises** (DE) presented the annual award for “Best Diagnostic Exercise” to Drs. Simona Zoppi, Alessia Di Blasio and Katia Varello of the Istituto Zooprofilattico Sperimentale del Piemonte Liguria e Valle d'Aosta for their DE on tuberculosis in a donkey.
Our second lectureship award of the evening was the Foundation’s Samuel Thompson Lectureship Award for 2018, an award voted on by the attendees each year at the Foundation’s Gross Path Review Course (held this year at Cornell University). Dr. Jennifer Chapman of the US Army Research Institute of Infectious Disease presented this year’s award to Dr. Andrew Miller of Cornell University, who lectured this year on both Pathology of Nonhuman Primates as well as Pathology of the Horse. This award was followed by the annual presentation (by Dr. Ana Alcaraz of the Western University College of Veterinary Medicine) of the Latin American Divisions Travel Awards, to Drs. Renee Laufer Amorim and Katia Groch of Sao Paulo State University. The final lectureship award of the night, the Foundation’s Robert L. Farrell Award for Lectureship excellence is presented to an individual who has served the Foundation for many years, presenting lectures around the world. This year’s winner, Dr. Paco Uzal, is known to all, and his name is synonymous with teaching excellence – he has been a long-term lecturer in many courses in South America, as well as the Gross Path Review Course, and has directed the Foundation’s AAVLD Diagnostic Path Workshop for last two years, as well as being its featured lecturer in 2018.

The final award of the evening Harold Casey Lifetime Teaching Award, which is awarded annually to a professor who has dedicated a career to teaching veterinary pathology. The award is not for research, or publication, and many awardees may only be known within their own university, as so much of their career has been spent on the necropsy floor teaching students and young faculty, and shaping the future of their department and our specialty through the development of young minds. This year, Dr. Julie Engiles of the University of Pennsylvania had the opportunity to play homage and honor her mentor, Dr. Michael Goldschmidt. The highlight of the evening was a brief speech by the man of the moment – Dr. Mike Goldschmidt, surrounded by his friends and wife Myra, reflecting on a career that touched so many. All those in attendance were touched as well by the humor, wisdom, and humility of this man, who reminded us what the purpose of this evening was all about.

The Foundation congratulates all of the winners, and we look forward to next year’s ceremony in San Antonio!

Bruce William
