The Davis-Thompson DVM Foundation comes to Ljubljana

After last year’s initial meeting in Belgrade, the “2nd Annual Davis-Thompson Foundation Eastern European Veterinary Pathology Meeting” was this year held at the Veterinary Faculty in the Slovenian capital of Ljubljana. Many of you may not have heard of this small, picturesque country which is home to approximately 2 million people, but the participants of this year’s meeting will surely remember it.

At the meeting, which took place between 29th and 31st May, the participants had the opportunity to listen to four amazing international speakers. Dr Fabio Del Piero (Louisiana State University) broke the ice with his interesting lectures on intoxications and cattle diseases. Dr Simon Priestnall (Royal Veterinary College) followed the next day with gripping lectures on infectious and gastrointestinal diseases of dogs and cats and reporting of gastrointestinal biopsies.

Continued on page 2 and 3
Dr Alexander Stoll (University of Surrey) and Dr Harriet Brooks-Brownlie (University of Bristol) wrapped it up with a splendid presentation of different forensic pathology topics. On the first day a lecture was also given by a local speaker Dr Tanja Švara who presented an interesting case of pulmonary hypoplasia and anasarca syndrome in two calves of the autochthonous Cika breed.
But the participants were not only offered top notch lectures, they also got a sneak peek of Slovenia. On Thursday afternoon the whole delegation of 58 participants, 4 speakers and 9 local organizers got on buses and headed off West towards the Slovenian Littoral region. They first visited a ham producer in Lokev where they had a tour of their facilities for producing Karst Prosciutto and other cured meat products and then feasted on these products together with sheep cheese made at the Veterinary Faculty’s farm Vremščica. Their excursion continued to the Stud farm Lipica, where they breed Slovenia’s national jewel, the Lipizzaner horse. This breed is known for its unique feature – the foals are born black or brown and with age turn white due to greying of their coat.

Thursday ended with a formal dinner at the oldest restaurant in Ljubljana, called Šestica, which dates back to 1776 and offers typical Slovenian cuisine. During dinner the guests also saw a short performance of Slovenian folklore dancing.

The weather started off rainy in the beginning of the event but fortunately turned sunny on Friday, which meant that after the meeting ended the participants were able to attend a walking tour of Ljubljana finishing in the centre of town at the Open Kitchen stalls.

The meeting proved as a great success and all have agreed that it would be great if this meeting continued as an annual event. The preliminary talks have already started and it is planned that next year’s meeting will be in North Macedonia’s city of Ohrid, a UNESCO natural and cultural heritage site.

At this point we would like to express our gratitude to the Dean of the Veterinary Faculty, University of Ljubljana for his support in organizing this event, to Dr Gregor Majdič and Mrs Anita Kermavnar for their encouraging words at the meeting’s opening and to all the participants who made the event so delightful. A great thank you also goes to all our sponsors who helped us make this event memorable.
Davis-Thompson Foundation Pathology Externship

Since 1980, the Davis-Thompson Foundation lab sites have hosted more than 125 veterinary students at 8 participating diagnostic laboratories. These students usually have a strong interest in pathology itself or zoo or poultry medicine that require a strong pathology background. The Foundation is always interested in having veterinary students apply for an externship and we would like to add more externship sites that do not usually have veterinary students, to help increase their interest and knowledge of pathology with some off-campus experience. For more information, contact Dr. Jim Britt, jobritt@sbcglobal.net; 501-912-1449.

Retiring?

Have slides left over from your recent slide seminar? Just looking to free up some storage space? The Foundation is looking for additional glass slides, kodachromes and other similar materials for its Correspondence Division and Study Centers. All materials should be well-identified with as much accompany history and discussion as possible, as these materials are expressly used for teaching. Moreover, as the Foundation is a publicly donative charity, all donated materials are tax-deductible. For more information, please contact Dr. Bruce Williams at bruce.h.williams.dvm@gmail.com.

Integration of Toxicology & Pathology in Drug Discovery & Development

10th Industrial Toxicology and Pathology Short Course – August 14-16, 2019, at Eli Lilly, Indianapolis, Indiana, USA. Cosponsored by the STP. Course Co-Directors: Drs. Wanda M. Haschek-Hock, University of Illinois (whaschek@illinois.edu) and Katie Heinz-Taheny, Eli Lilly (heinztahenykm@lilly.com). Register and view speaker schedule at go.illinois.edu/ITP. Contact ope@vetmed.illinois.edu or 217-333-2907 for additional information.

This course will serve as a foundation for those interested in drug development, especially early career pathologists and toxicologists, as well as residents and graduate students. Participants will hear from a variety of industry and government experts on a range of topics including introductory lectures on the role of the toxicologist and pathologist in drug development, overview of drug development, animal models and regulatory considerations as well as case based sessions addressing real scenarios such as determining the NOAEL. Opportunities for networking and establishing contact with industry experts will be provided.
Diagnostic Exercise
From The Davis-Thompson Foundation*

Case #107  Month: October  Year: 2018

Contributors: Mariana Martins Flores*, DVM, MS, Doctor in Veterinary Pathology; Rafael Almeida Fighera*, DVM, MS, Doctor in Veterinary Pathology. *Laboratory of Veterinary Pathology, Universidade Federal de Santa Maria (UFSM), Santa Maria, Rio Grande do Sul, Brazil.

Clinical History: An adult, female spayed, mixed-breed domestic shorthair cat was submitted to necropsy and had a history of intense salivation and incoordination. The owner, who suspected poisoning, reported that the cat died a few days after the onset of the clinical signs. The cat came from a farm located in Rio Grande do Sul, Brazil, and had free access to the outdoors.

Follow-up questions: Morphologic diagnosis? Main cause(s)? Clinical significance?

Answers and more info here!

*The Diagnostic Exercises are an initiative of the Latin Comparative Pathology Group (LCPG), the Latin American subdivision of The Davis-Thompson Foundation. These exercises are contributed by members and non-members from any country of residence. - Consider submitting an exercise!

The AAPSP is pleased to welcome Dr Francisco Uzal to Australia for the 2019 Annual Pathology Roadshow. Dr Uzal is Professor of Diagnostic Pathology and Chief of the San Bernardino branch of the California Animal Health and Food Safety Laboratory, UC Davis. He has been the coordinator of the Post-mortem Program for the California Horse Racing Board for the past 15 years and is a leading expert on clostridial diseases of animals. Dr Uzal has published more than 200 peer-reviewed articles, is the senior author of the “Alimentary Diseases” chapter for the 6th edition of Jubb, Kennedy and Palmer's Pathology of Domestic Animals, and the first author of the recent textbook Clostridial Diseases of Animals. Dr Uzal is an Associate Editor and Photo Editor of the Journal of Veterinary Diagnostic Investigation and Associate Editor of Anaerobe, and an editorial board member of several other journals. He is President of the Davis-Thompson Foundation and of the Latin Comparative Pathology Group and has lectured in many countries throughout North and Latin America, Europe, Asia and Oceania.

Over two days, Dr Uzal will provide a thorough overview of equine gross and histopathology, including respiratory, cardiovascular, nervous, urinary, reproductive and musculoskeletal pathology, with a special focus on enteric pathology and clostridial diseases.

**How to register?**

**MEMBERS** - Registration is free of charge for members of the AAPSP. Please RSVP with the venue you wish to attend, your name, member organisation and any dietary requirements.

**NON MEMBERS** - Registration (includes conference catering) is $885 for two days or $460 for one day which must be paid prior to attending.

Upcoming STP Trainee Award Deadlines

The Daniel Morton and Laura Dill Morton Scholarship Award Procedures

Application Deadline: November 1

The Daniel Morton and Laura Dill Morton Scholarship was established in 2016 to provide an award annually to an outstanding student/trainee with an interest in toxicologic pathology. Students with a DVM or equivalent degree enrolled in a full-time graduate or residency program who demonstrate commitment to toxicologic pathology and high potential for a successful career in this field are encouraged to apply. Applicants must submit a personal statement describing current research activities, interests and activities related to toxicologic pathology, and professional goals, two professional letters of recommendation with one letter from her/his academic advisor, and Curriculum Vitae. Applicants will be judged based on level of demonstrated interest in the field of toxicologic pathology, letters of recommendation and CV. A monetary award and engraved plaque will be presented at the Awards Ceremony during the STP Annual Meeting. Award acknowledgement will be included on the STP website and in the annual meeting issue of Toxicologic Pathology. Daniel Morton and Laura Dill Morton Scholarship Application

IATP/STP Charles Capen Trainee Award Procedures

Application Deadline: November 1

The Charles Capen Trainee Award given by the International Academy of Toxicologic Pathology (IATP) and the Society of Toxicologic Pathology (STP) recognizes Dr. Charles Capen and his legacy as a researcher, teacher, and mentor to the pathology and toxicology communities spanning more than four decades. Dr. Capen was recognized worldwide as an exceptional leader in veterinary and biomedical research. He was a highly regarded mentor to numerous graduate students and postdoctoral scientists. His students and trainees are now leaders throughout academia, government and industry. The awardee will receive a cash award in the amount of $2000.00 to further his or her training and education in the field of toxicologic pathology, plus complimentary STP annual meeting registration and complimentary STP student membership for the following year. He or she will be recognized during the Awards Ceremony at the STP Annual Meeting. Applicants are required to submit a published (or accepted for publication) manuscript from a peer-reviewed journal consisting of original work involving clinical or experimental research that relates to toxicologic pathology. IATP/STP Charles Capen Trainee Award Application
ASVP 2019 SCIENTIFIC CONFERENCE

Neuropathology: It’s A No Brainer!

DATE: 13-15 SEPTEMBER, 2019
VENUE: Mercure Hotel
10 Irwin Street
Perth, Western Australia

Registrations are now open for our 2019 deep dive into veterinary neuropathology.

Our keynote speaker, Dr Jennifer Koehler is section chief of surgical pathology at Auburn University, USA and a member of the CL Davis-Thompson Foundation’s Faculty of Discussants. Her research focuses on neurodegenerative diseases and canine brain tumours, and she is a founding member of the NIH-led Comparative Brain Tumor Consortium.

The conference program will feature clinical neurology correlates with diagnostic approaches to neurologic patients, as well as presentations from MD neuropathologists, and we anticipate significant interest from colleagues in clinical veterinary disciplines.

Visit our conference website for further information on our invited speakers, program, conference details and registration:

‘1st Guatemalan Meeting of the CL Davis/SW Thompson Foundation’
Guatemala City, April 9-10 2019

The 1st Guatemalan Meeting of the CL Davis/SW Thompson Foundation was held at the Faculty of Veterinary Medicine and Animal Husbandry, University of San Carlos de Guatemala, in Guatemala City, Guatemala, on April 9 and 10, 2019.

The seminar was organized by Dr. Dora Chang, Director of Accreditation, with help from Dr. Blanca Zelaya, Dr. Débora Rodríguez and a large number of other enthusiastic collaborators. Sponsors were the Faculty of Veterinary Medicine and Animal Husbandry, the CL Davis/SW Thompson Foundation and the Latin Comparative Pathology Group.

The lecturers were Drs Ana Alcaraz, from Western University of Health Sciences, California, Joseph Haynes, Iowa State University, Iowa and Francisco Uzal, UCDavis, California. Dr Alcaraz lectured on interpretation of gross lesions, tissue submission and diseases of the liver and the central nervous system. Dr Haynes gave lectures on skeletal and ocular pathology, and Dr Uzal presented on the formulation of gross diagnosis, alimentary and clostridial diseases.

The meeting was very well attended by close to 150 students, pathologists, microbiologists, lecturers and clinicians who interacted continuously with the faculty, asking questions and providing very helpful insights about animal diseases in Guatemala.

The organization was impeccable and the hospitality of our Guatemalan hosts was outstanding and highly appreciated. The excitement of the organizers, lecturers and audience was great and the seminar was an utter success.

In addition, a new CL Davis/SW Thompson Foundation study center was created in a classroom for virtual pathology teaching which was inaugurated during the meeting by the Dean of the Faculty, Dr. Gustavo Taracena. The Foundation donated a large number of books and DVDs, which are already part of the newly created study center. New seminars will be held in coming years in Guatemala in line with the Davis/Thomson Foundation mission to further the international advancement of education in veterinary and comparative pathology.
AAZV 26th Annual
Zoo & Wildlife Pathology Workshop

Sunday, 29 September 2019

9th RTP Rodent Pathology Symposium

Current Topics in Rodent Pathology

September 29 - October 1, 2019 • Raleigh, North Carolina

Registration now open!

The 2019 RTP Rodent Pathology Symposium will focus on the following areas:

• Natural Diseases of Rodents
• Medical Device Pathology in Rodent Models
• Nanoparticle-related Pathology in Rodent Models
• Toxicology for Pathologists
• Emerging Topics in Clinical Pathology

To register, please visit: https://rtprodentpathology.org/

The program offers 17 hours of Continuing Education credit
British Society of Toxicologic Pathology
Notice of Future Meetings

CES 3: Carcinogenesis
March 2020 - Department of Pathology, Cambridge, UK
Registration for this symposium will open in December 2019

This Continuing Education Symposium will provide an intermediate level overview on Carcinogenesis and the challenges with current research models. Topics to be covered include (but are not limited to): How to understand the relevance/future of rodent 104 week studies; how to interpret carcinogenicity data in the risk assessment of novel chemicals and pharmaceuticals; familiarisation with the latest molecular techniques used in the research and exploration of carcinogenesis; how to differentiate spontaneous from test article-related lesions and tumours and, follow real-world case studies to refine your skills and knowledge around regulatory authority. The format will include presentations, case histories and active participation of delegates. The Continuing Education Symposium will be of 3 days duration and the programme will be arranged such that each individual day can be attended as stand-alone CPD if desired.

For more information on any of these meetings, keep checking the website - http://www.bstp.org.uk/events or contact the BSTP Secretariat - bstpoffice@aol.com
