Inaugural General Path Meeting Shines in Florida

One of the Foundation's most eagerly-awaited new courses, the General Pathology "Beach Party" debuted to rave reviews in July in sunny St. Pete's Beach, Florida. An enthusiastic crowd of eighty individuals from different facets of our industry (anatomic and clinical pathologists, both certified, and those preparing for certification) were on hand for an information- and fun-filled weekend.

The course venue, the Sirata Beach Resort, certainly did not disappoint. One of many resorts on the St. Pete's beach strand, the Sirata provided the perfect setting for the course – sun, sand, and of course, the calm warm waters of the Gulf of Mexico. Many of the attendees took advantage of the beautiful scenery to get in that elusive Florida vacation with spouses and children; many more had trouble deciding whether to attend each and every lecture or find out what our host facility had to offer. Snorkeling, jet-ski riding, and swimming with dolphins were only a small selection of activities in which our attendees participated.

Course Lectures Ron Myers (left) and Jim MacLachlan model what the best-dressed Gen Path Lecturers were wearing this year in Florida.

Who says Gen Path can't be fun?! Not Richard Haworth, flanked by Leslie McLaughlin (l) and Catherine Ross (r.)

couldn't spend the time they wanted on the beach due to the excellent program (that is what Saturday and Sunday are for, folks!)

But the main focus was general pathology, and the course definitely did not disappoint in that respect (you can download the syllabus off of the Foundation web page) Lectures began at 8 AM and ran through 10 PM each day with an hour for lunch and two hours for dinner. The evening breakout reviews on unrelated topics, such as EM, immunohistochemistry, pathology of the dog, and a Thursday night gross exam proved almost as popular as our core topics, with over 50 participants showing up each night. More than one attendee bemoaned the fact that they

Second Division Symposium a Success in Northern Argentina

Key Personnel in Corrientes (l-r) Claus Buergelt, Eduardo Gimeno, Ted Clark, Milt McAlister, Mary Montenegro, and Marcial Sanchez Negrette

The II Argentine Symposium of the CL Davis Foundation took place at the National Northeast University in the city of Corrientes on July 18 and 19. The Symposium was preceded by the sixth biannual national Argentine pathology meeting (RAPAVE). More than 120 pathologists, graduate students, practitioners and veterinary students participated in the event, coming from all over Argentina but also from Brazil, Chile, Paraguay and Uruguay.

Dr. Claus Buergelt coordinated the two-day

Foundation symposium on bovine pathology. Dr. Ted Clark presented a complete atlas of bovine diseases and syndromes mainly devoted to feedlot animals. Dr. Buergelt presented a series of special

bovine cases with great enthusiasm. These lectures were translated into Spanish by three enthusiastic colleagues (Dr. Guillermo Rimoldi from Buenos Aires University, and Drs. Gabriel Traveria and Eduardo Gimeno from La Plata University). Dr. Milton McAllister surprised everyone by teaching for hours in a perfect Spanish language on diseases of dairy and beef calves. Milton's presentations were instrumental to improved everyone's knowledge of neosporosis, a problem that is on the increase in South America.

In extracurricular activities in Corrientes, the Argentine Veterinary Pathology Association met in assembly on July 17 to discuss the inauguration of an independent CL Davis Foundation Study Center in La Plata and further activities in the cities of Tandil in 2009 and Buenos Aires in 2010. A dinner and a following "almost all-night long" party took place on July 18, with a superb demonstration of dancing abilities from different members of the international group.

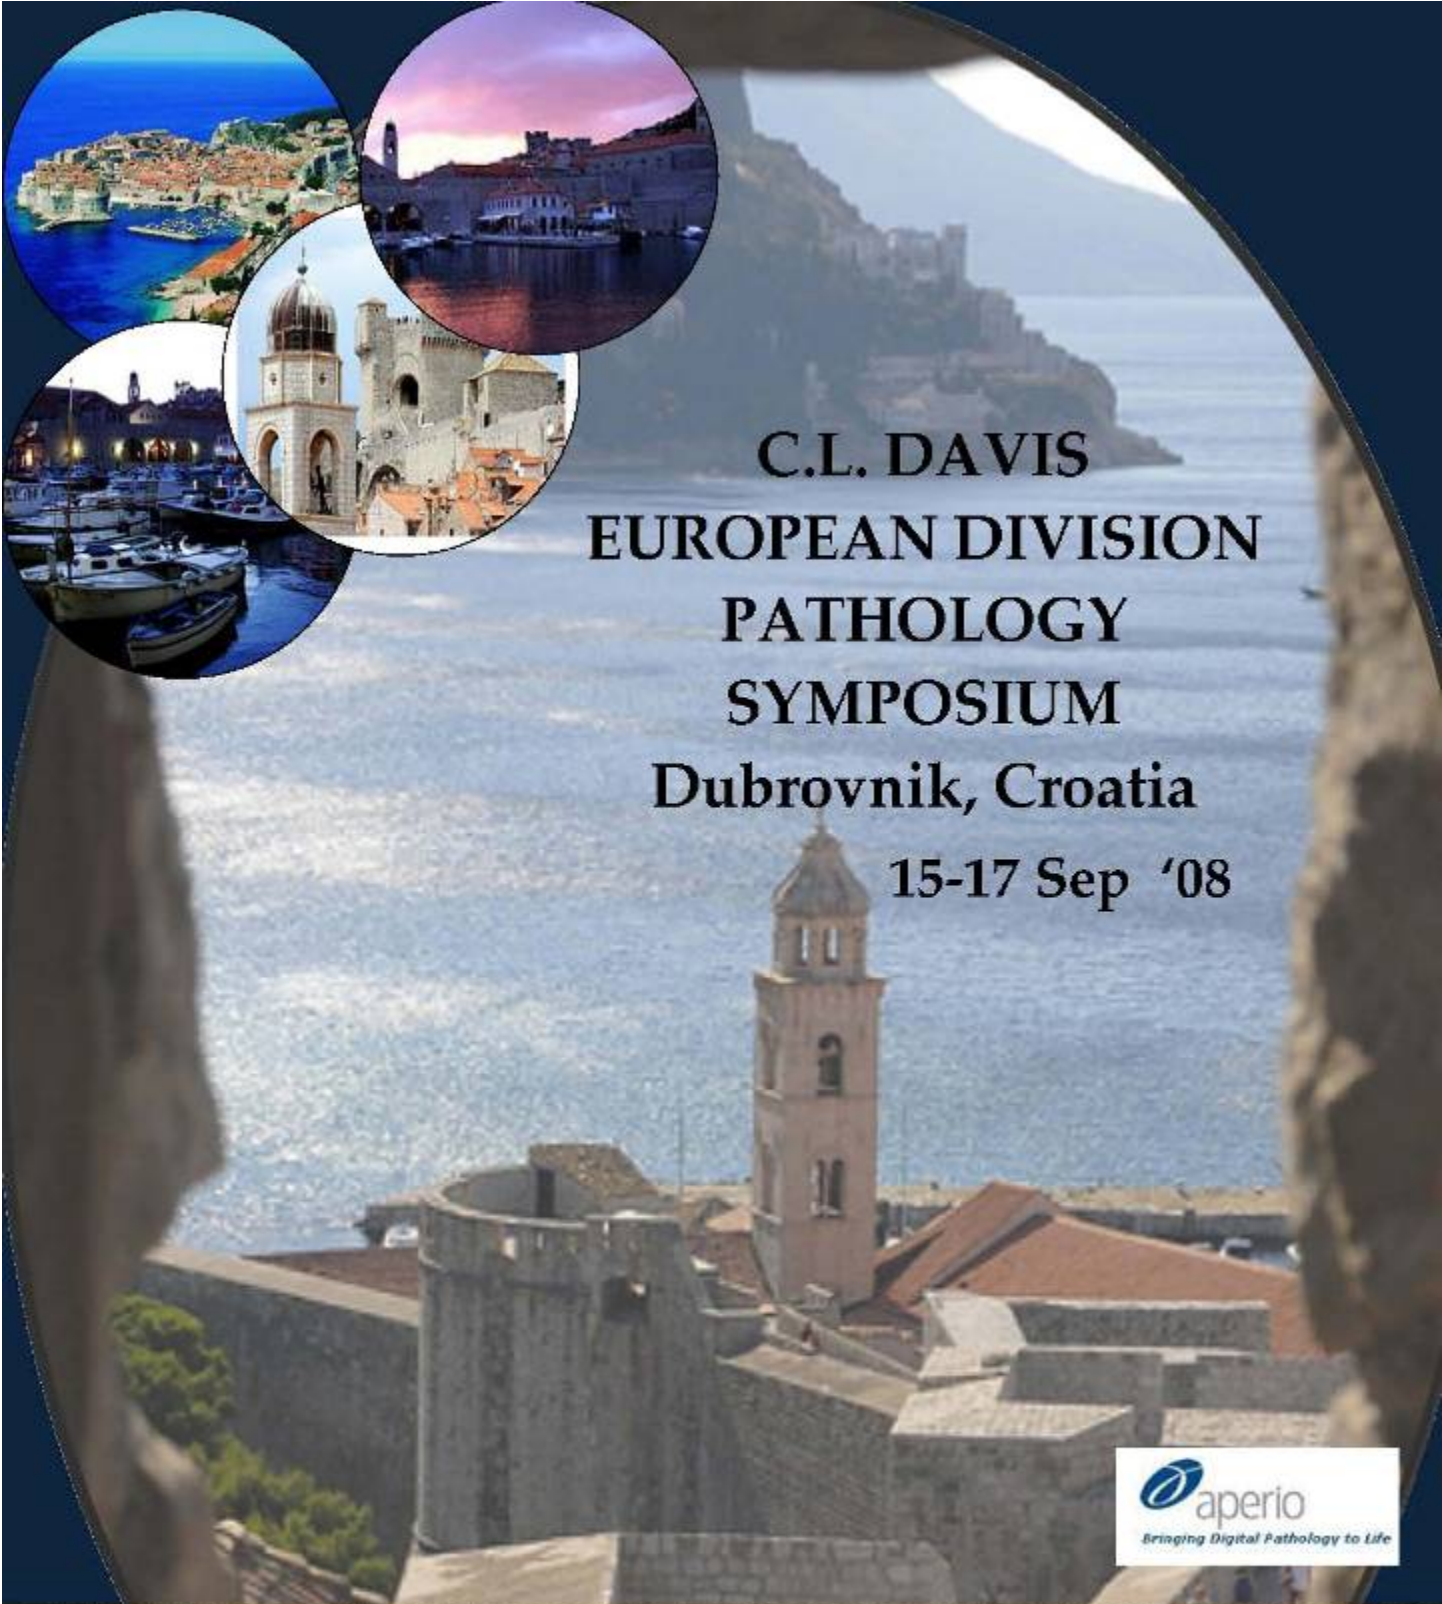

The next day, the group traveled to the veterinary school at La Plata, where on Monday, Dr. McAllister lectured on neosporosis and toxoplasmosis to more than 50 parasitologists and students. On July 23, Dr. Buergelt discussed the latest developments on paratuberculosis with Argentine colleagues. In addition, Claus donated a copy of McGavin et al's *Pathologic Basis of Veterinary Disease* to the Library of the Veterinary School.

This Corrientes meeting exemplifies the growing importance of the CL Davis Foundation for advancement of Veterinary Pathology around the world.

A lovely venue in Corrientes with Ted Clark still discussing pathology of feedlot cattle to enthusiastic members of the audience.

...Eduardo Juan Jimeno, Director, Argentine Subdivision

**C.L. DAVIS
EUROPEAN DIVISION
PATHOLOGY
SYMPOSIUM**

Dubrovnik, Croatia

15-17 Sep '08

**OPHTHALMIC PATHOLOGY
ACUTE AND CHRONIC INFLAMMATION – LARGE ANIMAL GI PATHOLOGY**

ORTHOPEDIC PATHOLOGY – 50 YEARS ON

REVISITING 22 CLASSIC ENTITIES
FROM THE 1958 ACVP MEETING
ON SKELETAL DISEASE

15 Nov 2008 – SAN ANTONIO, TX

Including:

- Hypertrophic osteopathy
- Rickets
- Porphyria
- Hypovitaminosis C
- Renal osteodystrophy
- Fluorosis
- Osteogenesis Imperfecta
- Osteoarthritis
- Actinomycosis
- Atrophic rhinitis
- Osteosarcoma
- Multiple myeloma
- Metastatic carcinoma
- Osteoarthritis
- Coccidiomycosis

Participants will receive a DVD set with the transcript and 260 images from the 1958 symposium, biographies of the original presenters, and 23 virtual slides of the entities presented in 1958 and 2008.

General Path Meeting *(continued from page 1)*

The speakers, mainly authors of the first six chapters in McGavin and Zachary's *Pathologic Basic of Veterinary Disease* put on an excellent program, showing off their mastery of the subject matter during lectures, some of which ran up to 9 hours in length. While focusing mainly on reviewing and digesting material from the book, many lecturers also discussed topics that have been discovered since the book's 2007 printing.

All in all, the first meeting was considered a tremendous success with the speakers, the venue, and the host, sandal-wearing, drink-serving tour guide Dr. Bruce Williams all getting high praise from the attendees. The Foundation has already begun planning for the 2nd iteration of this course at its new home on St. Pete's Beach. Mark your calendars for 6-10 July 2009 and be sure to join us "on the beach" in Florida!

Come home, Bruce! **Upper right:** Derek Mosier answers questions following his lectures on fluid dynamics and hemostasis. **Lower right:** The AFIP contingent enjoys the dinner hour on St. Pete's Beach.

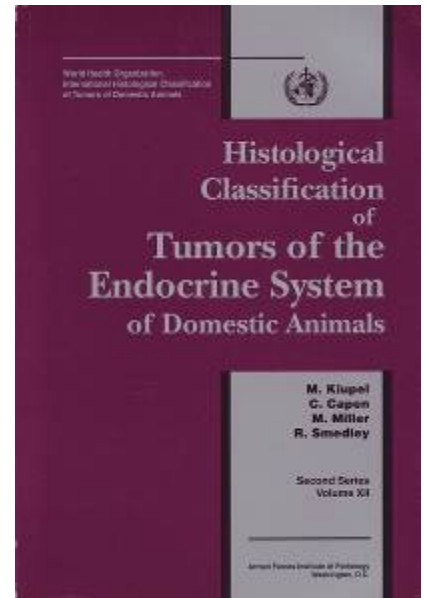

It's Finally HERE!!!

Histological Classification of Tumors of the Endocrine System of Domestic Animals

Authors: M. Kiupel, C. Capen, M. Miller, R. Smedley.

ISBN: 978-1-4276-3153-4 Available for US \$55.00

Order the last volume and complete your set! This 187-page volume on tumors of the endocrine system is replete with 195 full-color images, as well as the most exhaustive descriptions and reference lists of any of the WHO fascicles to date. The extensive discussions found in this must-have fascicle also include "tumor-like" lesions, classification of tumors of various endocrine organs based on hormone production, an extensive review of paraganglia and dispersed endocrine cells, and even references to common endocrine tumors in lab animal species!

Volume XII was a while in coming, but we are sure you will find it worth the wait! Books are shipped by USPS MediaMail. Please allow 2 weeks for delivery.

PLEASE FILL OUT THIS FORM COMPLETELY. INCOMPLETE ORDERS CANNOT BE PROCESSED.

STEM CELL THERAPY IN ANIMAL MODELS OF DISEASE

**Sponsored and hosted by Columbia University
Institute of Comparative Medicine, Department of Pathology & Cell Biology**

TIME & VENUE: October 3, Friday, 2008, 800 AM - 400 PM, Faculty club P&S

The one-day symposium will be focused on the advancements made in application of stem cell research and therapy in animal trials of human disease models. The speakers will discuss the evaluation of stem cell therapy diseases and future clinical applications in animal models of human diseases like coronary artery disease / myocardial infarction, cancer, Parkinson's disease, diabetes, skin diseases, etc. In addition, the role of stem cell in drug screening and toxicity, regulatory development and non-clinical safety issues will be addressed.

Further details regarding speakers will be published at www.cldavis.org, and mailed to members of the Davis Foundation.

For more information, please contact: Dr Manu Sebastian, Chief of Comparative Pathology, Columbia University, tel: 212-3052444/646-8311848 or Dr. Zadok Ruben; (zruben@patoximed.com) tel: 908-233-9740. The registration forms need to be emailed to Dr Manu Sebastian.

8th Annual C.L. Davis Diagnostic Pathology Symposium Gastrointestinal Pathology

*Diagnosis and
Pathogenesis of Enteric
Bacterial Diseases*

Faculty:

**Matti Kiupel
Fabio del Piero
Glen Songer
Roger Maes**

*Gastrointestinal
Pathology of Horses,
Cattle, Swine, Dogs,
and Cats*

*Diagnosis of Viral
Enteric Disease*

Given in association with the
51st Annual Meeting of the AAVLD
October 24, 2008 - Greensboro, NC

**Tuition: \$125 includes CD of
presentations, breaks, and 8 hours of
RACE-accredited CE.**

WILDLIFE PATHOLOGY

Short Course August 2008 Taronga Zoo

DIAGNOSTIC PATHOLOGY OF THE DISEASES OF AQUATIC, AERIAL AND TERRESTRIAL WILDLIFE

21 - 24 August, 2008

For the first time in Australia, this fascinating short course in comparative pathology of wildlife is brought to you by The Australian Registry of Wildlife Health in collaboration with the C. L. Davis Foundation.

The course is open to anyone with an interest in wildlife disease - pathologists, veterinarians, conservation biologists, veterinary students and postgraduate students.

The course will include the ecology of disease, diagnosis of vector-borne diseases, human influences on wildlife diseases, neurological syndrome and mass mortality investigation pathways, and much more!

Confirmed speakers include internationally renowned wildlife pathologists: Drs SCOTT FITZGERALD; GARY WOBESER; RICHARD MONTALI; and JUDY St. LEGER along with several highly respected local speakers.

Registration is only \$375, a modest fee for a comprehensive review of the diseases of wild fish, amphibians, reptiles, birds and mammals.

TO REGISTER YOUR INTEREST IN ATTENDING, PLEASE CONTACT: arwh@zoo.nsw.gov.au, Phone (02) 9932 4368 or download a draft agenda and registration form from our website

**2008 Primate Pathology Workshop
13-14 September, 2008
Colorado State University
Fort Collins, CO**

The Department of Microbiology, Immunology & Pathology, CSU, is pleased to host the 2008 Primate Pathology Workshop, to be held Saturday 13th – Sunday 14th September, at the CSU main campus, Fort Collins, CO.

Program.

Saturday 13th September: introduction to and overviews of major infectious disease studies and programs at MIP/CSU (incl. FIV, prion diseases, tuberculosis, highly pathogenic avian influenza and other “select agents”).

Sunday 14th September: non-human primate pathology case presentations.

As in the past, any interested is invited to present material from any interesting non-human primate case(s). Presentations are oral accompanied by visual aids. Presentations are anticipated to be 12-15 minutes long, depending on the final number of registered presentations. Submission deadline for cases is 1st July, 2008. Registration deadline for non-presenting participants is 1st August, 2008.

The registration fee is US\$50.00, which should be send as a check issued to Colorado State University (with a memo indicating PPW2008).

The Primate Pathology Workshop 2008 Registration Form (please print out entire page and send to address below.

Name: _____
Institution: _____

Address: _____

Phone: _____ E-mail: _____

Slides: For each case, please submit (i) 60 slides with cover-slipped H&E sections, (ii) a page detailing signalment and a short, pertinent history, and (iii) a separate page with description of the lesion(s), diagnosis, discussion, and references (if applicable).

Send the registration/submission form, registration-fee, slides, and case information to:
