Morphologic Diagnosis: _____

Cause: _____

4. Tissue from a rabbit.
Morphologic Diagnosis: _____

5. Tissue from a pig.
Morphologic Diagnosis: _____

Cause: _____

6. Tissue from a dog.
Morphologic Diagnosis: _____

Name three possible causes: _____

7. Tissue from a horse.
Morphologic Diagnosis: _____

Cause: _____

8. Tissue from a ferret.
Pathogenesis: _____

9. Tissue from a squirrel.
Morphologic Diagnosis: _____

Cause: _____

10. Tissue from a dog.
Pathogenesis: _____

11. Tissue from a pig.
Morphologic Diagnosis: _____

Name three possible causes: _____
12. Tissue from a canary.
Morphologic Diagnosis: _____

Cause: _____
13. Tissue from a cat.
Morphologic Diagnosis: _____

Cause: _____
14. Tissue from an ox.
Morphologic Diagnosis: _____

15. Tissue from a horse.
Morphologic Diagnosis: _____

Name the condition: _____
16. Tissue from a chicken.
Name the condition: _____
17. Tissue from a guinea pig.
Cause: _____
18. Tissue from an ox:
Morphologic Diagnosis: _____

Give two possible causes: _____

19. Tissue from a nude mouse.
Morphologic Diagnosis: _____
Cause: _____
20. Tissue from a cynomolgus monkey.
Morphologic Diagnosis: _____
Cause: _____
Name another affected organ. _____
21. Tissue from a dog.
Morphologic Diagnosis: _____
Name three possible causes: _____
22. Tissue from a cat.
Morphologic Diagnosis: _____
Cause: _____
23. Tissue from a dog.
Morphologic diagnosis: _____
Cause: _____
24. Tissue from a dog.
Morphologic Diagnosis: _____
25. Tissue from a horse.
Morphologic Diagnosis: _____
26. Tissue from a pig.
Morphologic Diagnosis: _____
Give two possible causes: _____
27. Tissue from a snake.
Name the agent: _____
28. Tissue from a calf.
Morphologic Diagnosis: _____
Cause: _____

29. Tissue from an ox.
Morphologic Diagnosis: _____

30. Tissue from a Tasmanian devil.
Name the condition: _____

Name the cell of origin: _____

31. Tissue from a snake.
Morphologic Diagnosis: _____

Cause: _____

32. Tissue from a tiger.
Pathogenesis: _____

33. Tissue from a chicken.
Name the condition: _____

34. Tissue from a dog.
Give four differential diagnoses: _____

35. Tissue from a pig.
Morphologic Diagnosis: _____

Cause: _____

36. Tissue from a cat.
Morphologic Diagnosis: _____

Cause: _____

37. Tissue from a donkey.
Morphologic Diagnosis: _____

Cause: _____

38. Tissue from a guinea pig.
Morphologic Diagnosis: _____

Cause: _____
Name a predisposing event: _____
39. Tissue from a pig.
Morphologic Diagnosis: _____

Cause: _____
40. Tissue from a dog.
Morphologic Diagnosis: _____

41. Tissue from a piglet.
Morphologic Diagnosis: _____

Cause: _____
42. Tissue from a dog.
Name the condition: _____
43. Tissue from a turkey.
Give two morphologic diagnoses: _____

Cause: _____
44. Tissue from an ox.
Morphologic Diagnosis: _____

45. Tissue from a goat.
Morphologic Diagnosis: _____

Cause: _____
Name two other lesions in this animal: _____

46. Tissue from a snake.
Morphologic Diagnosis: _____

Cause: _____
Name the condition: _____
47. Tissue from a pig.
Morphologic Diagnosis: _____

Cause: _____
48. Tissue from a pig.
Morphologic Diagnosis: _____

Cause: _____
49. Tissue from a guinea pig.
Morphologic Diagnosis: _____

Cause: _____
50. Tissue from a shark.
Morphologic Diagnosis: _____

Cause: _____
