   Morphologic Diagnosis: ____________________________
   _______________________________________________________
   Cause: ________________________________________________

10. Tissue from a dog.
    Pathogenesis: _________________________________________
    _______________________________________________________
    _______________________________________________________

11. Tissue from an ox.
    Morphologic Diagnosis: ____________________________
    _______________________________________________________
    Cause: ________________________________________________

12. Tissue from a dog.
    Morphologic Diagnosis: ____________________________
    _______________________________________________________
    Cause: ________________________________________________

13. Tissue from a dog.
    Morphologic Diagnosis: ____________________________
    Name an additional lesion in this animal: _________________

14. Tissue from an ox.
    Morphologic Diagnosis: ____________________________
    Cause: ________________________________________________

15. Tissue from a great blue heron.
    Name the agent: ______________________________________

16. Tissue from a dog.
    Morphologic Diagnosis: ____________________________
    _______________________________________________________

17. Tissue from an Atlantic bottlenose dolphin.
    Name the agent: ______________________________________

18. Tissue from a horse.
    Morphologic Diagnosis: ____________________________
    _______________________________________________________

19. Tissue from a sheep.
Give two morphologic diagnoses: ___________________________________
______________________________________________________________

20. Tissue from a dog.
Morphologic Diagnosis: ________________________________
______________________________________________________________

21. Tissue from a rhesus macaque.
Pathogenesis: _____________________________________________
______________________________________________________________
______________________________________________________________

22. Tissue from a red fox.
Morphologic Diagnosis: ______________________________________
Cause: ______________________________________________________

23. Tissue from a pig.
Morphologic diagnosis: ________________________________
Cause: ______________________________________________________

24. Tissue from a horse.
Morphologic Diagnosis: ______________________________________
Cause: ______________________________________________________

25. Tissue from a chicken.
Name the agent: _____________________________________________

Morphologic Diagnosis: ________________________________
Cause: ______________________________________________________

27. Tissue from a chicken.
Morphologic diagnosis: ________________________________
______________________________________________________________

28. Tissue from a goat.
Morphologic Diagnosis: ________________________________
Name a predisposing condition: ________________________________
29. Tissue from a dog.
   Give two morphologic diagnoses: ________________________________
   ________________________________

30. Tissue from a hamster.
   Morphologic Diagnosis: ________________________________
   Name a likely associated lesion: ________________________________

31. Tissue from a dog.
   Morphologic Diagnosis: ________________________________

32. Tissue from a lizard.
   Morphologic Diagnosis: ________________________________

33. Tissue from an ox.
   Morphologic Diagnosis: ________________________________
   Cause: ________________________________

34. Tissue from a weasel.
   Morphologic Diagnosis: ________________________________
   Cause: ________________________________

35. Tissue from an ox.
   Morphologic Diagnosis: ________________________________
   Name four possible causes: ________________________________

36. Tissue from a nude mouse.
   Morphologic Diagnosis: ________________________________
   Cause: ________________________________

37. Tissue from a dog.
   Morphologic Diagnosis: ________________________________
   Name two associated clinicopathologic abnormalities: _________________
38. Tissue from an ox
   Morphologic Diagnosis: ___________________________________________
   Cause: _________________________________________________________

39. Tissue from a guinea pig.
   Morphologic Diagnosis: ___________________________________________
   Cause: _________________________________________________________
   Name another likely lesion: _______________________________________

40. Tissue from an ox.
   Morphologic Diagnosis: ___________________________________________
   Cause: _________________________________________________________

41. Tissue from a chicken.
   Morphologic Diagnosis: ___________________________________________
   Cause: _________________________________________________________

42. Tissue from a duck.
   Name the condition: _____________________________________________
   Name the likely target organ: _____________________________________

43. Tissue from a nude mouse
   Morphologic Diagnosis: ___________________________________________
   Cause: _________________________________________________________

44. Tissue from a piglet.
   Morphologic Diagnosis: ___________________________________________
   Give two possible causes: _________________________________________

45. Tissue from a pig.
   Morphologic Diagnosis: ___________________________________________
   Cause: _________________________________________________________
   Name two other lesions in this animal: ______________________________

46. Tissue from a rat.
   Name the condition: ______________________________________________
47. Tissue from a dog
   Morphologic Diagnosis: ____________________________________________
   ________________________________________________________________

48. Tissue from a dog.
   Pathogenesis: ____________________________________________________
   ________________________________________________________________
   ________________________________________________________________

49. Tissue from a budgerigar
   Morphologic Diagnosis: ____________________________________________
   Cause: __________________________________________________________________

50. Tissue from a sheep.
   Morphologic Diagnosis: ____________________________________________
   Cause: __________________________________________________________________
